and connections Wilhelm Barner Rasmussen Rebecca Piekkari Joanna Scott Kennel and Catherine Welch Academy of Management Perspectives An interesting and insightful book It questions a lot of traditional thinking about international firms and the way they operate Throughout the book the reader is invited to develop a different perspective This perspective might be called a relationships and networks theory of the firm While this may sound familiar the book goes well beyond anything I have seen in the existing literature in terms of conceptualizing relationships and networks and in using this perspective to guide and interpret case study and survey research results William G Egelhoff Fordham University US It is now well accepted in the academic literature that the multinational corporation can be usefully modelled as a network of relationships But it is less well known that the origins of this perspective can be traced back to work done in Uppsala Sweden in the 1970s and 1980s The term business network was first used there and many important ideas around power and influence have also emerged from this research centre In this new book three of the key members of the Uppsala school develop a synthesis of the more recent ideas to come out of their research on networks By focusing on the concept of the embedded multinational they show how the internal networks of the multinational interact with the web of external networks each subsidiary unit has in its local market This book provides a definitive and compelling point of view of the importance of networking thinking to the study of the multinational corporation It is an important book and it will be widely cited in years to come Julian Birkinshaw London Business School UK Forsgren Holm and Johanson have been among the leaders in developing the idea of the multinational firm as a network that spans different country environments This perspective cautions the easy prescription that a multinational firm can do everything easily if it just has the right organizational form Relationships matter as do the legitimacy of the firm in the context of its foreign investments This book provides rich case insights into these dimensions Bruce Kogut INSEAD France This book expands the business network view on managerial issues in multinational corporations Specifically it scrutinises the importance of a subsidiary's external and internal business network for its strategic and organizational role within the corporation The internationalisation of firms in terms of management issues and headquarters control the influence of subsidiaries on decisions and learning processes within multinational corporations are examined in detail It is argued that *Managing Information Technology in Multinational Corporations* Edward Mozley Roche,1992 **Strategic Management of Multinational Corporations** Heidi Vernon Wortzel,Heidi Vernon,Lawrence H.
