Cultural Resources for Tourism Myriam Jansen-Verbeke,2008 The cultural heritage of regions and communities is presently being rediscovered and valorised as a driving force in building cultural identity and as a ubiquitous resource for dynamising cultural activities This process can lead to the development of cultural capital with clear territorial links and as such a favourable incubation condition for creating sustainable and competitive forms of cultural tourism Research on cultural resources for tourism implies both a multidisciplinary approach and methodological innovations to deal with such a complex

phenomenon The challenge to identify and map cultural heritage elements tangible and intangible in a pan European context has recently been dealt with in the ESPON project 1 3 3 2004 2006 Lack of adequate definitions poor databases and a showcase of national and sector differences in approaching culture as resource for development was the final balance of that explorative project These findings have prompted further case study research into the study of cultural heritage which is encapsulated in this book This publication differs from others on cultural tourism through its emphasis on spatial dynamics by analysing location and behaviour patterns in different tourism destinations by identifying the parameters of change induced by tourism and not in the least trial and error examples in policy making The book includes a rich variety of case studies mainly from all over Europe but also including cases set in Israel Cairo and India representing the views and findings of 21 international researchers and scholars in cultural tourism scanning unique situations in order to detect the common dynamics and impacts of tourismification The final objective is to propose consistent directions for policy based on empirical insights The book contributes significantly to the understanding of cultural diversity and territorial identity on the one hand and to the dynamics of tourism on the other all of which are key issues in local and regional planning and management As such they should be a source of inspiration for policy makers and an eye opener for students researchers and consultants in the field of cultural heritage and tourism and hopefully an interesting virtual trip from Savonlinna to Cairo from Santiago de Compostela to Sibiu crossing and discovering a kaleidoscope of colourful and unique cultural landscapes and tourismscapes
