Managing Natural Wealth:

Managing Natural Wealth Jeffrey R. Vincent, Rozali Mohamed Ali, 2010-09-30 The remarkably rich natural environment of Malaysia attracts the interest of both industry and the environmental community. *Managing Natural Wealth* analyzes major natural resource and environmental policy issues in the country during the 1970s and 1980s a period of profound socioeconomic change, rapid depletion of natural resources and the emergence of serious problems with pollution. *Managing Natural Wealth* is an important up date to *Environment and Development in a Resource Rich Economy* Malaysia under the New Economic Policy. First published in hardcover in 1997 this pathbreaking book emphasized economics as a source for analyzing the issues involved in environmental and natural resource management in developing countries. The access that Jeffrey Vincent and Rozali Mohamed Ali and the contributing authors had to unpublished data and key decisionmakers made their account an essential reference for policymakers and researchers in Malaysia and throughout the globe. *Managing Natural Wealth* includes a review of key developments since the 1990s by S Robert Aiken and Colin H Leigh two geographers with a long standing interest in environmental change in Malaysia and an understanding of the institutional context of its environmental policy that is unmatched in the scholarly community.

Management John Robertson Dunlap, Arthur Van Vlissingen, John M. Carmody, 1929 *Nontimber Forest Products in the United States* Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002 A quiet revolution is taking place in America's forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager This book provides the first comprehensive examination of nontimber forest products NTFPs in the United States illustrating their diverse importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them As the first extensive national overview of NTFP policy and management specific to the United States it brings together research from numerous disciplines and analytical perspectives such as economics mycology history ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural traditions forest policy and commerce They examine some of the major social economic and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape from the Pacific Northwest to the Caribbean From honey production to a review of nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands No other volume offers such a comprehensive overview of NTFPs in North America By examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests
