- The need to share bandwidth. The need to move the office or migrate. The need to offer new services. All of these are often reasons to move to dynamic IP.
- Dynamic IP is the best choice for the following reasons:
 - It is the most cost effective. Because "IP address" is a valuable resource, it's often a scarce item.
 - It is the most reliable. IP address is a static resource. It is not subject to being taken away or being lost.
 - It is the most flexible. IP address is a static resource. It can be used for many different applications. It can be used for different services. It can be used for different types of devices.
