Managing The Chinese Environment:

Environmental Management in China Jing Wu, I-Shin Chang, 2020-05-22 This book details various stages in the introduction establishment and evolution of China's environmental management system. By combining a literature review, comparative analysis and case study, it investigates the environmental management system in several key periods in order to systematically assess the necessary measures and appropriate adjustments the Chinese Government implemented to reconcile the growing conflicts between economic development and resources conservation in the context of rapid economic growth and economic transformation. Given its scope, the book offers a valuable resource for experts, scholars and government officials in related fields.

Managing the Chinese Environment Richard L. Edmonds, 2000 In the coming decades, environmental issues will play an increasing role in China's economic development, drive internal politics, legal development, international relations and regional development issues. While several books have appeared in the 1990s which describe tangible aspects of China's environmental degradation, this book concentrates its attention on management of China's environment within various contexts and represents the state of thinking on the subject by some of the world's key social scientists in this field. It contains an international perspective of environmental problems in China, often lacking in books about the Chinese environment. Chapters discuss environmental degradation in Chinese history, organisation of China's environmental protection network, the legal framework for environmental protection, agricultural land issues, water issues, biodiversity, energy, pollution, public health and business opportunities for foreign firms. While this book shows that there is lots of room for optimism, it also indicates that many environmental problems remain intractable and some are worsening.

Environmental Law in China Charles McElwee, 2010-12-01 In recent years, China's leaders have started to confront the environmental, economic and social costs of unchecked development. China's increasing reliance on foreign oil has engendered national security fears and launched a drive for more efficient transportation systems and domestic renewable energy projects. Meanwhile, pressure from a rising middle class and the international community has focused leadership attention on ways to make China's economic engine run more efficiently and with less impact upon the domestic and global environment. This profound shift in priorities has elevated environmental sustainability to the top of the national agenda. To advance this new agenda, the environmental laws that China has enacted over the past thirty years are being strengthened and new environmental regulations and standards are being issued everyday. Entities operating in China are faced with the need to understand the impact of China's environmental law requirements upon their businesses and to take actions to ensure that they are in compliance with those requirements.

In *Environmental Law in China: Managing Risk and Ensuring Compliance*, Charles McElwee addresses how China's environmental regulatory and legal frameworks are structured, how to maintain operational compliance with the environmental laws and regulations, how to ensure products sold in China comply with environmental regulations and the potential risks and liabilities that attend non-compliance. McElwee offers unique

insight into how environmental law is in fact applied setting forth a realistic account of the way companies encounter Chinese environmental regulations at both the local and national levels Environmental Management in Construction Heng Li,Zhen Chen,2007-01-24 Demands on the construction industry are changing and it is now virtually essential for environmental management to be considered at all stages of a project Many construction managers are finding a quantitative approach useful and this book outlines four quantitative methods which can be applied at different construction stages and which fit within a comprehensive framework of dynamic Environmental Impact Assessment EIA These include a method to quantitatively evaluate and reduce pollution and hazards levels a method to evaluate the environmental consciousness of proposed construction plans a method to reduce on site construction wastes through an incentive reward programme a method to promote C and D waste exchange in the local construction industry With an experimental case study of the application of these methods this book delivers a comprehensive review of environmental management issues in construction With regulatory requirements potentially favouring the quantitative approach this timely guide ensures that contractors will be able to keep pace with environmental management standards Successful Business Dealings and Management with China Oil, Gas and Chemical Giants Henry Wang,2014-01-10 This book focuses on doing businesses successfully with China oil gas and chemicals companies with real business cases on business management and contract negotiations all under one theme Drawing on the author s extensive experiences and knowledge of the China oil gas and chemicals industries the book presents a comprehensive and practical guide to the China oil industry structure and major Chinese oil companies It analyses China s oil gas and chemicals markets and its growth into the largest oil consumption market in the world It also examines energy security concerns and mitigation strategies to diversify crude import sources The book also analyses the key domestic and international players in China including the largest state multinational and national oil companies It looks at the largest China oil gas and chemical companies and analyses their profile business strategies leaders with relevant case studies It then examines successful engagement negotiation and management with the China giants The book illustrates with business case studies on successfully negotiating and managing business relations to foster trust and promote cooperation as well as the risks and rewards Business leaders universities business schools and government agencies will appreciate the book with its in depth knowledge and analysis of the China oil gas and chemical industries together with relevant business cases

Managing China's Energy Sector Hongyi Lai,Malcolm Warner,2017-10-02 Since China has now become the world s largest energy consumer its energy sector has understandably huge implications for the global economy This book examines the transformation of China s conventional and renewable energy sectors with special attention to state business relations Two studies examine the development of China s energy profile especially China s renewable energy Two others explore governmental relations with state owned enterprises SOEs and their reform Despite drastic restructuring in the late 1990s SOEs continue their oligopolistic control of the oil and gas sectors and even overshadow the stock market Three studies

investigate the factors that help propel the expansion of China's conventional energy firms as well as those producing renewable energy i.e. solar PV industry A study of China's solar PV industry suggests that China's governmental support for it has evolved from subsidising production a mercantile stage aimed at expanding the industry's global production and export share to subsidising the demand side aiming at expanding domestic demand and absorbing redundant manufacture capacity Another review of this industry finds that firms tend to pay heavy attention to extra firm institutional network relationships both inside and outside China and that buyer supplier networks are influenced by extra local managerial education The final chapter compares China's provinces and their embedded carbon footprints per capita in urban areas from a consumption perspective using a self organizing feature map SOFM model This book was originally published as a special issue of the Asia Pacific Business Review

Environmental Protection Policy and Experience in the U.S. and China's Western Regions Joel J. Kassiola, Sujian Guo, Jijiao Zhang, 2010-06-14 China is a multiethnic country with vast territory a land of diverse ecosystems With the drive for industrialization in China and the implementation of western grand development strategy in western regions both governments and people face great challenges in environmental protection and sustainable use of biodiversity resources as a result of growing interaction between human activities and natural environment To meet the challenges governments in these regions need to adopt a series of important policy measures not only to reduce industrial emissions but also to return farmland to forests and pasture to grasslands and to implement measures of ecological migration to reduce human activities in ecological conservation areas In this regard China must not only learn profound lessons from industrialized countries but also search for international cooperation The United States provides some good comparative case studies on the environmental protection grassroots environmental management and conservation policies in western regions This book attempts to address key questions about Chinese and U.S. environmental policies by looking at historical development of environmental protection and current environmental policy in the western regions of the two countries

Environmental Management in China Geping Qu, Jinchan Li, 1980 Environmental Governance in China Neil Carter, Arthur P.J. Mol, 2013-09-13 This is the first examination of how China is currently dealing with environmental problems and challenges and of its successes failures and dilemmas This new book gives special attention to the development of environmental governance in contemporary China especially on the urban industrial and infrastructure sectors showing how the rapid economic growth that has transformed China in recent years has major implications for the environment as well as future economic development Leading international scholars explore a range of key issues including economic growth and the environment the environmental policy process the legal framework for environmental protection the role of environmental NGOs energy policy water issues biotechnology and GMOs the international dimension This book shows how environmental policy politics and governance are core issues posed by China's accelerated economic development At the same time it analyzes illustrates and argues that major steps are under way in taking up these challenges In doing so the

book provides an in depth balanced and comprehensive assessment of contemporary environmental reforms in China This book was previously published as a special issue of Environmental Governance **Environmental Management in Developing Countries** Kin-che Lam,1983 **Water Quality and Environmental Management in Asia H.** Utsumi,Tetsuya Kusuda,T. Kusuda,2002-05-31 Selected Proceedings of Asian Waterqual 2001 the IWA Asia Pacific Regional Conference held in Fukuoka Japan 12 15 September 2001 The world s growing population and its rising water consumption are greatly increasing the pressure on water resources growing wastewater discharges and expanding use of chemicals are severely affecting the water environment The new millennium confronts the water management profession and society in general with a set of challenges of unprecedented magnitude and complexity and many of these worldwide problems are seen at their most acute in Asia The 8th Asian Waterqual conference provided a major forum to address these issues these selected proceedings contain 73 high quality papers chosen after peer review Subjects covered include drinking water quality treatment and distribution wastewater treatment and reuse environmental remediation ecotoxicology in the aquatic environment hazard assessment and control of microbiology hazard assessment of micropollutants and endocrine disruptors water quality monitoring and modeling ecological modeling and simulation and water resources management and protection These papers tackle the challenges of water management reporting scientific and technological innovations and the institutional and administrative strategies required These proceedings will prove a major information resource for any scientist engineer practitioner or regulator with an interest in water quality and environmental management *The Changing Nature of Management in China* Nigel Campbell,Sylvain R. F. Plasschaert,David H. Brown,1991 Examines the changes in management in Chinese industry analyzes the requirements and methods suggested for managerial development related to the overall organizational structure of industry and presents case studies of trade and co operation between China and various European countries Managing Economic Reforms in Post-Mao China Kuotsai Liou,1998-04-16 Breakout singer and actress from the Nickelodian hit show Victorious who now has her own show Sam The Way You ll Never Know and many more *The Politics of Waste Management in Greater China* Natalie Wai Man Wong,2021-04-20 The growth of municipal waste is a common challenge found in the urbanised cities of Greater China but the question of how to manage municipal waste is controversial Wong examines the politics of managing municipal waste in three cities of Greater China Guangzhou Taipei and Hong Kong She looks at the controversies that arise from the issue and the consequent politicisation of the various solutions that are adopted Focusing particularly on the dynamics of policy actors in the three cities she compares the different political situations in each with the others This provides a valuable lens through which to explore the larger issue of the political transformation of Environmental Management in the Greater China region A compelling insight into environmental policymaking in Greater China for scholars studying the dynamics of Chinese politics Environmental Management M. Sivakumar,R.N. Chowdhury,1998 The Second International Conference on Environmental Management

ICEM2 focuses on the engineering management of the water and geo environments and aims to bring together scientists engineers and other professionals to review as well as to report on the latest developments in the field This book contains 160 peer reviewed papers covering the following interdisciplinary themes Sustainable development environmental management Water wastewater and stormwater management Water quality sediment transport Total catchment management Waste management and industrial waste products Geotechnology and the environment Slope stability and landslide management Natural hazards and management Mine environmental engineering China-ASEAN Environment Outlook 1 (CAEO-1) China-ASEAN Environmental Cooperation,2017-09-25 This book presents a comprehensive analysis of the status and progress of China ASEAN green development and examines the common development issues in China and ASEAN Member States AMSs It also explores development trends within the framework of global and regional environmental governance and discusses the approaches towards green development in China and AMSs offering its own definition of green development and using a pressure state response PSR model to build a framework for assessing green development The book includes typical policy measures and numerous practices for green development in China and AMSs in the form of tables figures and boxes Based on detailed analysis it argues that the global 2030 Agenda for Sustainable Development brings significant opportunities to China and AMSs that the ongoing pragmatic cooperation should be further advanced and that a connection between the Belt and Road Initiative and green ASEAN Community should be established to achieve regional sustainable development As such it furthers readers understanding of environment and development and practical policy advice for promoting China ASEAN cooperation on environment and green development Intended for decision makers from the government business sector and civil societies who are working to boost green development and China ASEAN cooperation it is also a valuable resource for government officials researchers and non experts interested in creating a balanced relationship between the environment and development **The Politics of Public Participation and the Emergence of Environmental Proto-movements in China** Anna M. Brettell,2003 **Chinese Environment and Development** ,1993 Local Environmental Politics in China Genia Kostka,2017-07-05 Knowledge and insight in national environmental governance in China is widespread However increasingly it has been acknowledged that the major problems in guiding the Chinese economy and society towards sustainability are to be found at the local level This book illuminates the fast changing dynamics of local environmental politics in China a topic only marginally addressed in the literature In the course of building up an institutional framework for environmental governance over the last decade local actors have generated a variety of policy innovations and experiments In large measure these are creative responses to two main challenges associated with translating national environmental policies into local realities The first such challenge is a policy implementation gap stemming from the absence of the state capacity necessary to the implementation of environmental measures The second challenge refers to the need for local non state actors to engage in environmental management

oftentimes such a participation gap contributes to implementation failures In recent years we have seen a multitude of initiatives within China at the provincial level and below designed to bridge both gaps Hence the central aim of this book is to assess these experiments and innovations in local environmental politics This book was originally published as a special issue of the Journal of Environmental Policy and Planning **Marketing Management in China** Philip Kotler, Kevin Lane Keller, Taihong Lu, 2009 This adaptation provides hard to find and well researched China cases that offer insights while covering a wide variety of contexts spanning international companies operating in China to Chinese companies that are beginning to venture overseas
