Mode In Javanese Music:

Mode in Javanese Music Susan Pratt Walton, 1987 One of the most controversial aspects of Javanese gamelan music is its musical mode pathet From her experience as a performer of sindhenan or female singing Walton analyses the melodies and defines the basic laws of mode for sindhenan She explains more convincingly than previous authors how two systems of mode operate simultaneously in gamelan music to enhance its aesthetic appeal

Reader's Guide to Music Murray Steib, 2013-12-02 The Reader's Guide to Music is designed to provide a useful single volume guide to the ever increasing number of English language book length studies in music Each entry consists of a bibliography of some 3 20 titles and an essay in which these titles are evaluated by an expert in the field in light of the history of writing and scholarship on the given topic The more than 500 entries include not just writings on major composers in music history but also the genres in which they worked from early chant to rock and roll and topics important to the various disciplines of music scholarship from aesthetics to gay lesbian musicology

Music in Java Ernst Heins, 1990

The Natural Musician Dina Kirnarskaya, 2009-06-11 One of the great mysteries of music is how it affects us in multitude of ways Whether talking about our individual tastes as listeners or individual differences as performers what are the psychological qualities that can turn some people into great musicians but not others Is it down to genes sheer hard work or some other quality in the individual The Natural Musician is the story of how we become composers performers or just discriminating listeners It searches for those psychological traits essential for turning one into a musician Unlike many others Kirnarskaya does believe in the existence of talent but argues that it is due to multiplicative factors which she describes analyses and shows how to test She also sheds light on the essence and origins of perfect pitch examines the triumphs and tortures of musical prodigies and considers the implications of her theories for the teaching of music After a foreword from the legendary conductor Gennady Rodhestvensky the book looks at our basic musical faculties how we perceive sounds distinguish their pitch and structure and recognise rhythm It then examines the nature of musical empathy what it is that allows us to perceive and emotionally connect with music The second part of the book focuses on the creative processes behind writing music The third section deals with music education looking at the role of innate and inherited characteristics in the formation of talent and considering why many who excel at an early age burn out later on The book ends exploring how musical development can shape the human brain strengthening other cognitive faculties including those unrelated to music This is a book that will fascinate anyone with an interest in music and musicians from the fields of music psychology and education to musicians themselves whether amateur and professional

Music Cultures of the Pacific, the Near East, and Asia William P. Malm, 1996 Surveys the basic kinds of music instruments found in this area
