**DIFFICULTIES** Jeannie Sutcliffe,1990-11-16 This is a practical handbook for all those who wish to offer high quality learning opportunities to adults with learning difficulties. It stresses the quality of provision throughout and is illustrated by many examples of good practice from all areas of curriculum and delivery. The importance of the widest possible range of learning opportunities is also emphasized and providers are urged to go beyond the limited menu of basic and social skills. For too long education has been a process done to rather than with this group of learners. This book advocates a learner centred approach based on choice and decision making by people with learning difficulties. Mathematics Teacher Education the first of its kind addresses the learning of mathematics teachers at all levels of schooling to teach mathematics and the provision of activity and programmes in which this learning can take place. It consists of four volumes. Volume 4 of this handbook has the title The Mathematics Teacher Educator as a Developing Professional. The volume seeks to complement the other three volumes by focusing on knowledge and roles of teacher educators working with teachers in teacher education processes and practices. In this respect it is unique. Chapter authors represent a community of teacher educators world wide who can speak from practical professional and theoretical viewpoints about what it means to promote teacher education practice. The volume is in 3 main sections. In the first we focus on Challenges to and Theory in Mathematics Teacher Education. Here authors write from perspectives of theory and or challenge and relate this to examples and insights from their practice. The second section Reflection On Developing as a Mathematics Teacher Educator has four autobiographical chapters in which authors delineate their experiences as teacher educators and relate these to theoretical and or moral standpoints. In Section 3 Working With Prospective and Practising Teachers What We Learn What We Come to Know authors write from perspectives on practice in many cases the practices in which they themselves have engaged and relate this to theoretical perspectives and rationales for teacher education programmes. The volume also has an introductory

chapter in which the purpose and content of the volume is set out and a final chapter that syntheses themes and issues from the chapters as a whole offering an overview of the field and suggesting future directions Bibliographical Information for the complete set VOLUME 1 Knowledge and Beliefs in Mathematics Teaching and Teaching Development Peter Sullivan Monash University Clayton Australia and Terry Wood Purdue University West Lafayette USA eds paperback 978 90 8790 541 5 hardback 978 90 8790 542 2 ebook 978 90 8790 543 9 VOLUME 2 Tools and Processes in Mathematics Teacher Education Dina Tirosh Tel Aviv University Israel and Terry Wood Purdue University West Lafayette USA eds paperback 978 90 8790 544 6 hardback 978 90 8790 545 3 ebook 978 90 8790 546 0 VOLUME 3 Participants in Mathematics Teacher Education Individuals Teams Communities and Networks Konrad Krainer University of Klagenfurt Austria and Terry Wood Purdue University West Lafayette USA eds paperback 978 90 8790 547 7 hardback 978 90 8790 548 4 ebook 978 90 8790 549 1 VOLUME 4 The Mathematics Teacher Educator as a Developing Professional Barbara Jaworski Loughborough University UK and Terry Wood Purdue University West Lafayette USA eds paperback 978 90 8790 550 7 hardback 978 90 8790 551 4 ebook 978 90 8790 552 1
