and something close to a miracle in a largely hostile universe In these dazzling pages readers meet the big charismatic animals of the Adirondacks the black bear and the moose We encounter little creatures too all of which lead fascinating lives while nearly unseen tiny fish that live in exquisite mountain streams the infuriating and almost invisible biting insects called no see ums centipedes millipedes and earthworms Discover an orchid that pays a steep price for its rough treatment of bumblebees plants so desperate for nitrogen they ve taken to catching animals and eating them poison ivy and the reasons why we might want to exchange our dislike of it for love and a common wildflower that goes through serial sex changes Loons owls falcons eagles and songbirds pour out effusions of apparent ecstasy here along with much about bobcats foxes snowshoe hares beavers and flying squirrels Snakes frogs salamanders and big predatory fish make appearances also as well as fungi that produce light in the dark and bacteria that manipulate the atmosphere to their own advantage even causing rain and snow to fall The Nature of the Place is Kanze s love letter to his home the Adirondacks Gathering materials from his decades long column at the Adirondack Explorer and elsewhere extensively revised and rewritten for this book Kanze s singular meditations on the flora and fauna of his home resonate far beyond his own beautiful beloved biologically vibrant neck of the woods

The Disappearance of Butterflies Josef H. Reichholf,2020-10-22 In the last fifty years our butterfly populations have declined by more than eighty per cent and butterflies are now facing the very real prospect of extinction It is hard to remember the time when fields and meadows were full of these beautiful delicate creatures today we rarely catch a glimpse of the Wild Cherry Sphinx moths Duke of Burgundy or the even once common Small Tortoiseshell butterflies The High Brown Fritillary butterfly and the Stout Dart Moth have virtually disappeared The eminent entomologist and award winning author Josef H Reichholf began studying butterflies in the late 1950s He brings a lifetime of scientific experience and expertise to bear on one of the great environmental catastrophes of our time He takes us on a journey into the wonderful world of butterflies from the small nymphs that emerge from lakes in air bubbles to the trusting purple emperors drunk on toad poison and immerses us in a world that we are in danger of losing forever Step by step he explains the science behind this impending ecological disaster and shows how it is linked to pesticides over fertilization and the intensive farming practices of the agribusiness His book is a passionate plea for biodiversity and the protection of butterflies **ENGLISH PRACTICE**
