Pakistan Crisis:

Pakistan in Crisis Ashok Kapur, 2006-04-14 With these questions in mind Professor Kapur charts the continuous power struggles of Pakistan's ruling elites Using a historical and comparative approach he shows how the search for democracy and national identity has been hindered by army intervention political intrigue and the failure of Islam to unite the various ethnic factions While pessimistic about the chances for democracy in Pakistan he hopes that the democratic pluralism and broad based political activity emerging in much of Eastern Europe and the Third World will inspire ordinary Pakistanis to transform their country into a nation in spirit as well as in name From Crisis to Crisis: Pakistan 1962-1969 Herbert Feldman, 1972

Pakistan's Inter-Services Intelligence Directorate Owen L. Sirrs, 2016-07-01 This book is the first comprehensive study of Pakistan's Inter Services Intelligence Directorate ISI The rise of Pakistan backed religious extremist groups in Afghanistan India and Central Asia has focused international attention on Pakistan's premier intelligence organization and covert action advocate the Inter Services Intelligence Directorate or ISI While ISI is regarded as one of the most powerful government agencies in Pakistan today surprisingly little has been written about it from an academic perspective This book addresses critical gaps in our understanding of this agency including its domestic security mission covert backing of the Afghan Taliban and its links to al Qaeda Using primary source materials including declassified intelligence and diplomatic reporting press reports and memoirs this book explores how ISI was transformed from a small negligible counter intelligence outfit of the late 1940s into the national security behemoth of today with extensive responsibilities in domestic security political interference and covert action This study concludes that reforming or even eliminating ISI will be fundamental if Pakistan is to successfully transition from an army run national security state to a stable democratic society that enjoys peaceful relations with its neighbours This book will be of interest to students of intelligence studies South Asian politics foreign policy and international security in general *Pakistan's Nuclear Policy* Zafar Khan, 2014-07-17 In May 1998 in reaction to India's nuclear weapons tests Pakistan tested six nuclear weapons Following this the country opted for a policy of minimum deterrence and within a year Pakistan had altered its policy stance by adding the modifier of minimum credible deterrence This book looks at how this seemingly innocuous shift seriously impacted on Pakistan's nuclear policy direction and whether

the concept of minimum has lost its significance in the South Asian region's changed changing strategic environment After providing a brief historical background exploring why and how Pakistan carried out the nuclear development program the book questions why Pakistan could not sustain the minimum deterrence that it had conceptualized in the immediate aftermath of the 1998 test It examines the conceptual theoretical framework of the essentials of minimum deterrence in order to question whether Pakistan's nuclear policy remained consistent with this as well as to discover the rudimentary factors that are responsible for the inconsistencies with regard to minimum deterrence conceived in this study The book goes on to look at the policy options that Pakistan had after acquiring the nuclear capability and what the rationale was for selecting minimum deterrence The book not only highlights Pakistan's deterrent force building but also analyzes closely Pakistan's doctrinal posture of first use option Furthermore it examines the policy towards arms control and disarmament and discusses whether these individual policy orientations are consistent with the minimum deterrence Conceptually providing a deeper understanding of Pakistan's post 1998 nuclear policy this book critically examines whether the minimum deterrence conceived could be sustained both at the theoretical and operational levels It will be a useful contribution in the field of Nuclear Policy Security Studies Asian Politics Proliferation Non Proliferation Studies and Peace Studies This book will be of interest to policy makers scholars and students of nuclear policy nuclear proliferation and arms control related research
