For people who have attended a basic Whole Hearted Healing or Peak States workshop it is an in depth review of the material they covered. For people who have practised WHH for a few years using *The Basic Whole Hearted Healing Manual* as a guide it is an update written for laypeople that includes the latest advances in our understanding of traumas and healing. For therapists it is an aid in explaining WHH to clients and in empowering them to participate fully in their own healing. And it's an entry level textbook for students working with peak states of consciousness. *Preparing for Trauma Work in Clinical Mental Health* Lisa Compton, Corie Schoeneberg, 2020-09-08. The trauma treatment process is presented within the tri-phasic framework which is applicable across settings, disciplines and various theoretical orientations. Each chapter also provides experiential activities that link the chapter content with clinician reflection and application of knowledge and skills which instructors and supervisors can easily utilize for evaluation and gatekeeping regarding a student's mastery of the content. An ideal resource for graduate level faculty and supervisors, this book offers a versatile application for mental health related fields including counseling psychology, social work, school counseling, substance abuse and marriage and family therapy. Designed for students and professional clinicians, this groundbreaking text fills an important education and training gap by providing a comprehensive and enlightening presentation of trauma work while also emphasizing the clinician's growth in self-awareness and professional development.
