**Minority Access to Information Technology**  
Harry Pachon,Elsa E. Macias,Paula Y. Bagasao,2000 *Knowledge & Power in the Global Economy* David Gabbard,2008

The second edition of Knowledge and Power in the Global Economy examines how neoliberal and neoconservative policies are working in tandem to privatize and commercialize public schools It looks at how these policies and the agendas behind them have impacted the internal dynamics of school management teaching and learning as well as how they have transformed the external dynamics of education from a public good or service offered to serve public interests to a private enterprise primarily serving private interests In addition to information critique and analysis multiple perspectives are provided that readers can draw upon to formulate an alternative vision of education as a crucial element of social change along democratic and egalitarian lines The first edition of this volume provided a critical encyclopedic approach to the rhetoric of educational reform as it developed from the 1980s through the 1990s critiquing its vocabulary elaborating the multiplicity of ways that the logic of neoliberalism and the emerging patterns of high stakes testing and accountability were impacting the curriculum and introducing ideas associated with alternative and liberatory educational projects Since its publication in 2000 policy developments such as the No Child Left Behind Act of 2001 in the U S and others in the U K and other parts of the world have nationalized and intensified these patterns deepening the logic and extent of neoliberalism s hold over educational reforms At the same time it is impossible to understand the current crises in education solely in terms of neoliberalism the impact of neoconservatism must also be considered Hence this second edition has a new subtitle The Effects of School Reform in a Neoliberal Neoconservative Age This edition is structured around five themes Political and Social Foundations Anti Educational Foundations The Set Up Anti Educational Foundations The Trap Classroom Consequence Democracy s Path This volume will particularly interest scholars and professionals across the fields of

educational foundations curriculum theory and educational policy and is well suited as a text for courses in these areas

Digital Literacies for Learning Allan Martin, Dan Madigan, 2006 In the 21st century digital tools enable information to be generated faster and in greater profusion than ever before to the point where its extent and value are literally beyond imagining. Such quantities can only be meaningfully addressed using more digital tools and thus our relationship to information is fundamentally changed. This situation presents a particular challenge to processes of learning and teaching and demands a response from both information professionals and educators. Enabling education in a digital environment means not only changing the form in which learning opportunities are offered but also enabling students to survive and prosper in digitally based learning environments. This collection brings together a global community of educators, educational researchers, librarians and IT strategists to consider how learners need to be equipped in an educational environment that is increasingly suffused with digital technology. Traditional notions of literacy need to be challenged and new literacies including information literacy and IT literacy need to be considered as foundation elements for digitally involved learners. Leading international experts from the USA, Canada, Australia, New Zealand, South Africa, Mexico and throughout Europe contribute to the debate and Hannelore Rader, Librarian and Dean of the University Libraries, University of Louisville, Kentucky provides the foreword. The book is in two parts. In Part 1, Literacies in the Digital Age, the contributors analyse how digital technologies have enabled transformative change in the ways in which learning can be constructed and discuss the nature of the new literacies that have emerged in this new virtual and e learning environment. In Part 2, Enabling and Supporting Digital Literacies, the contributors go on to consider the ways in which digital literacies can be made available to learners and how these literacies are being relocated in a more student centred environment within the broader perspective of learning Readership. This book takes the issues raised in the successful Information and IT Literacy, also co edited by Allan Martin, into a broader context. It is essential reading for all information professionals and educators involved in developing strategies and practices for learning in a digital age.

**Undoing the Digital** Cathy Burnett, Guy Merchant, 2020-03-27

Undoing the Digital challenges common ways of understanding digital technology and its relationships to literacy and literacy education. The book explores how a sociomaterial perspective can provide an alternative analysis of literacy in the context of digital communication. Introducing a series of conceptual tools and examples, the book examines digital communication as an emergent interweaving of social material and semiotic resources. The perspective invites literacy research to focus more on the relations associated with the process of making meaning, the new collaborations, stories, conceptualisations, directions and intentions that take shape in and also help to shape the contemporary mediascape. Drawing on studies conducted in a variety of contexts, this book is key reading for all advanced students and researchers of literacy and digital media within Education, Applied Linguistics and Media Communication Studies.
