Kuther, 2025-08-26 *Adolescence in Context* by award winning author

Tara L Kuther is a topically oriented text that connects learners to the science shaping our understanding of today's teenagers and young adults. Organized around three core themes: the centrality of context, the importance of research, and the applied value of developmental science, the text presents classic and current research along with foundational theories framed in real-life intersectional contexts such as sex, gender, race, ethnicity, ability, and socioeconomic status. With the new Second Edition, students can expect to gain a deeper understanding of adolescence that they can apply to their personal lives and future careers.

De Gruyter Handbook of Digital Cultures Grant Bollmer, Katherine Guinness, Yiğit Soncul, 2025-09-22

As Digital Cultures becomes the dominant term used by many across a variety of intellectual fields to describe the social, aesthetic, and political impact of digital media, it is necessary to provide a reference volume that specifies and defines the bounds of scholarly debates and curricular outlines for an otherwise amorphous interdisciplinary space. This handbook provides a comprehensive reference for the varied methodologies, historical frames, and theoretical perspectives essential for the study of Digital Cultures today. In outlining these foundations, it serves as a practical guide for educators and students into the broad range of perspectives grouped together for the critical historical and social scientific study of digital media. It also looks into the future and outlines an agenda for future research by examining not only the origins of the concept of Digital Culture but emerging topics and themes still in development, such as the relation between digital technology and climate change, artificial intelligence and knowledge, sensation and aesthetics, and the rise of new infrastructures reinventing not only the built environment but the boundaries of nations and sovereignty.

Research Anthology on Fake News, Political Warfare, and Combatting the Spread of Misinformation Management Association, Information Resources, 2020-10-30

With recent headlines around fake news from world leaders and around presidential elections, Twitter and other social media platforms being pressured to detect and label misinformation posted on their platforms, as well as misinformation around COVID-19 and its vaccine, the world has seen an increase in protests, policy changes, and even chaos surrounding this information. This spread of misinformation, when left unchecked, can turn fiction into fact and result in a mass misconception of the truth that shapes opinions, creates false narratives, and impacts multiple facets of society in potentially detrimental ways, indicating a need for the latest research on how the devastating impacts of this trend, how to discern facts from misinformation, as well as more information on technological advancements in fake news detection. The *Research Anthology on Fake News, Political Warfare, and Combatting the Spread of Misinformation* is a compilation of the most comprehensive previously published and highly cited research from prestigious institutions including Columbia University and Stanford University, USA, which focuses on understanding fake news, how it spreads, its negative effects, and current solutions being investigated. While highlighting topics such as fake news, trending conspiracy theories, media distrust, political warfare, and detection methods, this book is ideally intended for practitioners, stakeholders, researchers, academicians, and students interested in the continuing surge of fake news and its at times dangerous results.
