Optics And Information Theory:

Optics and Information Theory Francis T. S. Yu, 1976 Entropy and Information Optics Francis T.S. Yu, 2017-11-28 This book shows there is a profound connection between information and entropy Without this connection information would be more difficult to apply to science This book covers the connection and the application to modern optics and radar imaging It shows that there exists a profound relationship between Einstein's relativity theory and Schrödinger's quantum mechanics by means of the uncertainty principle In due of the uncertainty relation this book shows that every bit of information takes time and energy to transfer to create and to observe The new edition contains 3 new chapters on radar imaging with optics science in the myth of information and time and the enigma of space Fundamentals of Quantum Optics and Quantum Information Peter Lambropoulos, David Petrosyan, 2007-01-30 Another book on Quantum Optics or Quantum Information Well not actly A more descriptive title might be A guided tour through basic quantum mechanics quantum optics and quantum information Even better a few words on its origin and our motivation for undertaking the task might be useful to the potential reader in deciding whether to turn the pages beyond this preface For more than ten years now a graduate course on quantum optics has been taught in the physics department of the University of Crete Spanning two semesters it originally consisted of a collection of topics representative of what can be found in the numerous by now excellent books on quantum optics Over the last four years or so however the course acquired a gradually increasing segment of what is broadly referred to as quantum information which at this point is approximately half of the material Inevitably the topics on standard quantum optics had to be reduced or compressed accordingly Entropy and Information Optics Francis T.S. Yu, 2000-03-17 Identifies the relationship between entropy and information optics as the impetus for the research and development of high speed high data rate and high capacity communication systems Examines computing pattern recognition and wavelet transformation
