Buffalo Ravinder Singh Kuntal, Radha Gupta, D. Rajendran, Vishal Patil, 2022-04-22 Livestock Ration Formulation for Dairy Cattle and Buffalo provides an interdisciplinary integrative perspective and optimization on dairy cattle feed formulation problem solving It helps dairy farmers by introducing them the right frequency and right amount of balanced diet to be fed to cattle s and buffaloes at different body condition so that their feeding cost should be decreased and there should be increase in income for dairy farmers as they don t have enough knowledge of feeding practice It helps animal nutritionist to work for dairy farmers which have very limited feed resources to fulfil nutrients requirement in terms of crude protein CP total digestible nutrient TDN calcium Ca and phosphorus P by developing a software programme to plan a balanced low budget diet It includes the Linear and Goal programming model for non pregnant dairy buffalo is been solved using Hybrid Real Coded Genetic Algorithm and the results are compared with Real Coded Genetic Algorithm RGA considering different versions like RGA without crossover RGA without Mutation RGA with crossover and mutation These models can also be applied with other nutritional models like CNCPS INRA This book is a step forward in that direction to provide least cost diet formulation based on nutrient requirement of the cattle and buffalo which is been calculated according to Indian Council of Agricultural Research ICAR 2013 and NRC 2001 on dry matter basis provides a clear and precise platform for other researcher in Animal Nutrition field which also give initial platform to build a software and android application to formulate least cost ration Based on data and algorithm used in this book which helps Dairy farmers directly to feed balanced diet at

cheap rate Features It is a good reference to local dairy farmers by introducing them to the right frequency and right amount of balanced diet to be fed to cattle and buffaloes at different production cycles It will provide basic platform and some solutions to built up software about cattle nutrition development and least cost formulation for end user It has several techniques for optimizing animal diet formulation but a good balance between coding programming and animal nutrition is incorporated towards application of soft computing technique to improve the quality of the solution due to rigidity of the constraints
