Orange Trees Of Versailles:

The Orange Trees of Versailles Annie Pietri, 2009-04-23 When Marion Dutilleul enters the service of the Marquise de Montespan she never imagines that her ability to recognize scents and to blend them into perfumes will win her the favor of Louis XIV's mistress. But the marquise quickly has the young girl creating new perfumes for her. Eager to please and hopeful that her olfactory gifts will win her recognition, Marion concocts memorable fragrances. Then to her horror, credit is bestowed on someone else. Marion feels betrayed. Now Marion opens her eyes and ears in addition to her nose and realizes that beneath the splendor of palace life is a place teeming with deceit. To survive, she must use her keen sense of smell not to create perfumes but to thwart those who would do her and one of France's beloved monarchs great harm. Orange Trees of Versailles Annie Pietri, 2005-11-01 In the 1670s, fourteen-year-old Marion, who has a talent for making perfumes, gets the chance to serve Louis XIV's mistress at the palace of Versailles, where she gets caught up in palace intrigue.

Glasshouses Fiona Grant, 2013-07-10 Since the early seventeenth century, when the cultivation of exotic plants and fruit became fashionable in northern Europe, glasshouses have offered an artificial climate in which they could flourish. At first, these structures were within reach only of the very richest, and growing one's own oranges, orchids, pineapples, or bananas was a sign of great wealth. But by the mid-nineteenth century, manufacturers emerged to cater for a growing middle-class market. Glasshouses became increasingly sophisticated, with different types tailored to house specific crops, and manufacturers competing with one another by developing their own house styles, leading to a wealth of designs endlessly fascinating to the garden or architectural historian. In *Glasshouses*, Fiona Grant provides an illustrated introduction to the subject, including the twentieth-century decline and recent attempts at restoration.

Territorial Ambitions and the Gardens of Versailles Chandra Mukerji, 1997-09-25 In seventeenth-century France, land took on new importance for the practice of politics and rituals of court life. In her major new book, Chandra Mukerji highlights the connections between the two seemingly disparate activities of engineering and garden design. She shows how at Versailles, in particular, the royal park showcased French skills in using nature and art to design a distinctively French landscape and create a naturalized political territoriality. She challenges the association of state power with social and legal structures alone and demonstrates the importance for Louis XIV and his state of a controlled physical site, a demarcated French territory within the wider European geo-political continent.

Citrus Pierre Laszlo, 2008-10 Walk into your local grocery store and down the produce aisle and you'll find a dazzling array of citrus, from navel oranges and clementines to grapefruit and key limes, and sometimes even more exotic fare like the Japanese yuzu or the baboon lemon. Nearly 100 million tons of citrus are produced globally every year, but where did these fruits first come from? How did they find their way into the Western world? And how did they become both a culinary and cultural phenomenon? Pierre Laszlo here traces the spectacular rise and spread of citrus across the globe, from Southeast Asia in 4000 BC through North Africa and the Roman Empire to early modern Spain and Portugal, whose explorers introduced the

fruits to the Americas during the 1500s Blending scientific rigor with personal curiosity Citrus ransacks over two millennia of world history exploring the numerous roles that citrus has played in agriculture horticulture cooking nutrition religion and art from the Jewish feast of the Tabernacles through the gardens and courts of Versailles to the canvasses of Vincent van Gogh to the orange groves of southern California and the juicing industry of today Laszlo has approached the lore of citrus fruit with the lan of a master chef the man is French after all mixing history economics biology and chemistry to produce a book that will bring a smile to readers of every taste Natural History Altogether charming eccentric erudite and definitely worth the price Times Higher Education Supplement Stimulating Laszlo shows that the citrus fruit is a treasure trove of chemicals that are highly useful to humankind which also happens to taste wonderful Sunday Times UK A short but brilliant account of 6 000 years of citrus fruits that should be devoured with fervor Financial Times Did you know there are a billion citrus trees under cultivation or that grapefruit juice may potentiate the effects of Viagra Citrus mines over two millennia of history to explore the spread of these fruits out of Asia their commercialization in the United States and enduring symbolism the world over New Scientist
