

A medical professional in blue scrubs and a mask is visible in the background of an operating room, focused on a task. The foreground is dominated by a white, rectangular container with a metal handle. The container has a label with the text "HUMAN ORGAN FOR TRANSPLANT" printed in red capital letters. The background is a blurred, clinical setting with a blue wall and a white flower arrangement.

Twice Dead Margaret M. Lock,2002 Medical knowledge and technology have been sufficiently advanced for surgeons to perform thousands of transplants each year This text traces the discourse since 1970 that contributed to the locating of a new criterion of death in the brain Biolust, Brain Death, and the Battle Over Organ Transplants William R.

LaFleur,2022-11-03 William LaFleur 1936 2010 an eminent scholar of Japanese studies left behind a substantial number of influential publications as well as several unpublished works The most significant of these examines debates concerning the practice of organ transplantation in Japan and the United States and is published here for the first time This provocative book challenges the North American medical and bioethical consensus that considers the transplantation of organs from brain dead donors as an unalloyed good It joins a growing chorus of voices that question the assumption that brain death can be equated facilely with death It provides a deep investigation of debates in Japan introducing numerous Japanese bioethicists whose work has never been treated in English It also provides a history of similar debates in the United States problematizing the commonly held view that the American public was quick and eager to accept the redefinition of death A work of intellectual and social history this book also directly engages with questions that grow ever more relevant as the technologies we develop to extend life continue to advance While the benefits of these technologies are obvious their costs are often more difficult to articulate Calling attention to the risks associated with our current biotech trajectory LaFleur stakes out a highly original position that does not fall neatly onto either side of contemporary US ideological divides

Organ Transplants Mark V. Nadel,1993 **Organ Transplants** Melissa Abramovitz,2012-06-12 Every ten minutes someone is added to the national transplant waiting list according to the United Network for Organ Sharing Currently around 118 415 people need a lifesaving organ transplant As transplants become more common controversies over who should receive an organ and possible methods of increasing the organ supply have arisen This book offers a comprehensive and balanced discussion of the issues surrounding organ and tissue transplants Readers will learn about the moral ethical and medical dilemmas that surface as science continues to develop new lifesaving and life enhancing technologies Organ Transplants and Ethics David Lamb,2020-07-20 Originally published in 1990 this study of the moral problems bound up with

transplant therapy addresses a finely balanced distinction between ethical issues relating to its experimental nature on the one hand and those which arise when transplantation is routine on the other Among the issues examined are proposals for routine cadaveric harvesting criteria for organ and tissue procurement from living donors foetuses non human animals and current ethical problems with artificial implants Written as a contribution to practical philosophy this book will interest ethicists and health care professionals *Atlas of Organ Transplantation* Abhinav Humar,Arthur J.
