Organic Electronic Spectral Data John P. Phillips, Dallas Bates, Henry Feuer, B. S. Thyagarajan, 1982-09-22 **Organic Electronic Spectral Data 1983** John P. Phillips, Robert E. Lyle, Paul R. Jones, **Organic Electronic Spectral Data, Volume 25, 1983** John P. Phillips, Dallas Bates, Henry Feuer, B. S. Thyagarajan, 1989-08-18 This annual series continues the cooperative effort to abstract and publish in formula order all the ultraviolet visible spectra of organic compounds presented in the journal literature Over 50 chemists have searched 100 plus titles during the course of this project to assemble over 350 000 spectra throughout these volumes *The Publishers' Trade List Annual* ,1989 **Dangerous Properties of Industrial Materials Report** ,1995 Fee-Based Services in Sci-Tech Libraries Ellis Mount, 2013-10-18 This timely and important book explores how fee based services have developed in various types of sci tech libraries The authoritative contributors focus on the current changing financial aspects of the sci tech library operation and clarify for the reader how these changes have brought about conditions in which traditional methods of funding are no longer adequate What new options are open and how they are best being applied in today s sci tech libraries is fully and clearly explained and illustrated Topics explored include cost allocation and cost recovery fees for computer searching and the relationship between sci tech libraries and serials agents **Scientific and Technical Books and Serials in Print** ,1989 **Sources, Emission and Exposure for Trichloroethylene (TCE) and Related Chemicals** ,2001 Biographies of Scientists for Sci-Tech Libraries Tony Stankus, 2019-12-05 This book first published in 1991 is an invaluable guide to biographies of scientists from a wide variety of scientific fields The books selected for this highly descriptive bibliography help librarians shatter readers stereotypes of scientists as monomaniacal and uninteresting people by providing interesting and provocative titles to capture the interest of students and other readers The biographies included in this very special bibliography were carefully selected for their humour and human insights to give future scientists encouragement inspiration and an understanding of the origins of particular scientific fields These biographies are unique in that they explore the whole personality of the scientist giving students a glimpse at the variety and drama of the lives beyond well known contributions or Nobel prize accomplishments

Spectra-Structure Correlation John P. Phillips, 2013-10-22 Spectra Structure Correlation focuses on absorption spectroscopy of organic compounds including radiation absorption and analysis of compounds The publication first offers information on wavelength classification of absorption spectra intensities and shapes of absorption bands mechanisms for the absorption of radiation and solvent phase and temperature effects The text also focuses on the spectra of hydrocarbons as well as olefins cyclopropanes benzenes allenes and cumulenes cyclobutanes cyclopentanes and cyclohexanes The manuscript reviews compounds with oxygen and nitrogen functions Discussions focus on aldehydes and ketones alcohols carboxylic acids phenols ethers and peroxides acid derivatives amides and imides amines and nitriles and related functions The text also ponders on organic compounds containing halogen sulfur phosphorus silicon or boron inorganic compounds and complex

materials Concerns include polymers steroids purines pyrimidines nucleic acids amino acids polypeptides and proteins The publication is a dependable reference for readers interested in absorption spectroscopy or organic compounds Advances in Chromatography J. Calvin Giddings,1991-09-27 The Advances in Chromatography series provides the most up to date information on a wide range of developments in chromatographic methods and applications This is Volume 32 originally published in 1991 UV-VIS Spectroscopy and Its Applications Heinz-Helmut Perkampus,2013-03-08 UV VIS spectroscopy is one of the oldest methods in molecular spectroscopy The definitive formulation of the Bouguer Lambert Beer law in 1852 created the basis for the quantitative evaluation of absorption measurements at an early date This led firstly to colorimetry then to photometry and finally to spectrophotometry This evolution ran parallel with the development of detectors for measuring light intensities i e from the human eye via the photo element and photocell to the photomultiplier and from the photographic plate to the present silicon diode detector both of which allow simultaneous measurement of the complete spectrum With the development of quantum chemistry increasing attention was paid to the correlation between light absorption and the structure of matter with the result that in recent decades a number of excellent discussions of the theory of electronic spectroscopy UV VIS and luminescence spectroscopy have been published Consequently this extremely interesting aspect of molecular spectroscopy has dominated the teaching of the subject both in my own lectures and those of others However it is often overlooked that in addition to the theory applications of spectroscopic methods are of particular interest to scientists For this reason a lecture series about electronic spectroscopy given in the Institute for Physical Chemistry at the Heinrich Heine University in Dusseldorf was supplemented by one about UV VIS spectroscopy and its applications This formed the basis of the present book *Irregular Serials & Annuals* ,1986 **The Cumulative Book Index** ,1990 A world list of books in the English language *Journal of General Chemistry of the USSR.* ,1988-09 **New Technical Books** New York Public Library,1985 **Journal of General Chemistry of the U.S.S.R. in English Translation** ,1989 Subject Guide to Books in Print ,1993 **American Journal of Physics** ,1990 *Bibliographic Index* ,1989
