Entrepreneurial Ecosystems Parisa Baig, Elizabeth Montoya-Martinez, Maksim Belitski, Christina Theodoraki, Andrew Godley, 2025-08-30 This book emerged from a need in the field of entrepreneurial ecosystems to link foundational theories with practical realities faced by entrepreneurs as they acquire and manage resources when creating a new firm It also seeks to address how different agents of the entrepreneurial ecosystems interact to facilitate new venture formation The book's core thesis posits that a comprehensive grasp of resource dynamics including acquisition and management and flow is essential for cultivating sustainable entrepreneurial environments that can significantly reduce the failure rate of startups The book seeks to provide answers to how resources within these ecosystems financial social and human are acquired and how these processes impact the success or failure of new enterprises Through a combination of case studies theoretical analysis and policy recommendations the work distinguishes itself by integrating rigorous academic theory with practical real world application This dual approach not only resolves current ambiguities regarding the roles and effects of different ecosystem participants but also reveals the frequently overlooked narratives of interdependence and collaboration that are crucial for fostering sustainable entrepreneurial settings

Sustainability and Short-term Policies Stefan Sjöblom, Kjell Andersson, Sarah Skerratt, 2016-04-01 There has been a profound change within the sphere of government and societal regulation in recent years Traditional hierarchical government has been challenged by new governance instruments relying on negotiations instead of command and control Alongside this development there has been a change in the time framing of politics and steering Traditional politics implicitly has been based on stability and permanence while new forms of governance explicitly are based on just in time actions such as projects and issue based collaborations in networks and programs This book analyses the implications of this shortening of time frames focusing particularly on spatial policy interventions Spatial policies have a special relevance when it comes to governance and new forms of societal steering On the one hand the local geographical level in politics is the principal battleground for the struggle between top down and bottom up approaches and aspirations On the other hand many of the most burning issues of

our time require a global strategic approach for example climate change resource depletion population growth are anchored in space and the physical world Whether and how short term spatial approaches can achieve sustainable development outcomes is thus a critical question and forms the focus of this volume The book examines the characteristics of temporary policy measures across a range of rural urban and regional contexts in four continents Europe North America Oceania and Africa The outcomes and effects of these policies and interventions are analysed particularly focusing on the tension between short term interventions and long term effects
