

Work from Home: Cyber Security Tips

LEARN ABOUT YOUR COMPANY'S WORK FROM HOME POLICIES

Before you start working from home, make sure that you're familiar with your company's guidelines for cybersecurity at home.

INVEST IN A DEDICATED DEVICE FOR WORK

Get a separate laptop, tablet, or even a smartphone. This will help to keep your personal data separate from your work data, which will make it easier to protect both.

SECURE YOUR WI-FI NETWORK

Use a strong password. Use WPA/WPA security. Enable MAC filtering. The last thing you want is for someone to be able to access your work data or devices.

BEWARE OF PHISHING ATTACKS

To protect yourself from phishing attacks, you should never click on links or open attachments from unknown sources.

LOCK AND ENABLE TRACKING ON YOUR WORK DEVICES

It's important to lock your work devices when you're not using them. This will help to prevent anyone from accessing your data if your device is lost or stolen.

REGULARLY BACK UP IMPORTANT DATA

In the event that your work device is lost or stolen, or if it becomes infected with malware, you'll want to have a backup of your important data.

USE AN AUTHENTICATOR APP

Authenticator apps generate one-time codes that you can use to log in, even if someone has your password.

KEEP YOUR SOFTWARE AND OPERATING SYSTEM UP TO DATE

Vulnerabilities in software and operating systems made public, might let hackers exploit them to gain access to devices and data.

We recommend: The top cybersecurity tip for work from home — use a VPN

A VPN encrypts your internet traffic and make it appear as if you're browsing from a different location. You can bypass censorship and access geo-blocked content, and protect your online identity.
