**Desert and Justice** Serena Olsaretti, 2003-07-24 Serena Olsaretti brings together new essays by leading moral and political philosophers on the nature of desert and justice their relations with each other and with other values Does justice require that individuals get what they deserve What exactly is involved in giving people what they deserve Does treating people as responsible agents require that we make room for desert in the economic sphere as well as in the attribution of moral praise and blame and in the dispensing of punishment How does respecting desert square with considerations of equality Does desert like justice have a comparative aspect These are questions of great practical as well as theoretical importance this book is unique in offering a sustained examination of them from various perspectives

**The Problem of Evil for Atheists** Yujin Nagasawa, 2024-06-19 The problem of evil has long perplexed traditional theists Why do terrible events such as crimes wars and natural disasters occur in a world believed to be created by an omnipotent and wholly good God In The Problem of Evil for Atheists Yujin Nagasawa offers a fresh perspective that seeks to transform the perennial philosophical debate on this matter The book contends that the problem of evil surpasses its conventional understanding impacting not only traditional theists but also posing a challenge for atheists and other non theists including pantheists axiarchists and followers of Eastern religious traditions Moreover it posits that traditional theists who typically

embrace some form of supernaturalism are better equipped to address the problem than naturalist atheists non theists because the only potentially successful response requires supernaturalism Conversely it suggests that if atheists non theists can develop a successful naturalist response traditional theists can also adopt it The volume concludes that traditional theists are better positioned than atheists non theists to grapple with the problem an unexpected assertion given that the problem of evil is normally viewed as an argument against traditional theism and in favour of atheism non theism The Problem of Evil for Atheists presents a comprehensive defence of a fundamentally new approach to tackling the age old philosophical conundrum By challenging the conventional perspective it endeavours to reshape our understanding and interpretation of evil in a profound manner An open access title available under the terms of a CC BY NC ND 4 0 licence

## **Understanding**

**Suicide and Its Prevention** Federico Sanchez, 2010-06 Finally a book that explains suicide using the latest research in suicidology A must read for mental health professionals and the survivors of suicide who want to understand why suicide happens The material in this book should be incorporated into the curriculum of psychology and psychiatry because suicide is such a vital topic that is hardly covered in medical schools due to the lack of a coherent theory of the brain in general and suicide in particular This is an important book for all professionals who deal with mental disorders in general and suicide in particular It is the author's fifth book where suicide is explained not as a mysterious process but as a natural consequence of the reactions of the brain under certain conditions when suffering mental disorders The author begins with a brief summary of the statistics of the whos the hows and the wheres of suicide This gives us a clear idea of the magnitude of the problem of suicide of the cost not only in lives but of the emotional toll of the survivors as well as the financial burdens on society as a whole Then as an important first step to understanding the medical community's standard approaches to mental disease he reviews briefly the current psychiatric terminology and the diagnostic tools concerning mental disorders He presents the most accepted current theories and models of suicide He explains what a psychiatric emergency is and what to expect if one ever encounters such a situation And he explains how suicide risk assessment is currently done along with other important considerations He proceeds to explain in everyday language where possible his theory of how the brain works beginning with a simple explanation of how neurons communicate with each other Later he explains how the brain controls the body and how we see with the back of our heads how memory systems become a logical extension or expansion of our sensory and motor systems Awareness and attention are introduced first as an evolutionary tool that aids the senses gather more information from the environment and ultimately as tools that aid in thinking reasoning and constructing our past our lives and our identities But all this would mean nothing without the introduction of emotions and how the brain constructs contexts He explains how emotions are an integral part of memories and how these are related to contexts how basically the brain has created a very concise and compact filing memory system A clear explanation of how emotions are triggered regulated and dissipated is next These lead to a learned discussion of how these various systems can go haywire causing

mental disorders A brief but perhaps new and revolutionary approach to these mental disorders is presented next including Obsessive Compulsive Disorder Delirium Dementia and Other Amnestic Disorders Manic Depression and Depression and Schizophrenia Ultimately it becomes clear how under certain conditions these disorders can lead to suicide The difference between attempters and completers is also explained He then presents a suicide autopsy as an exercise to show how varied the opinions of experts in the field of suicidology are and compares it to his own theories and lets the reader decide for himself who is closer to the truth The fallacy of many expert opinions of where research needs to go is presented The book gives a few words of advice on various therapies and the rationality of their approaches and cautions against their limitations The book devotes a chapter to suicide prevention in the military and how these efforts are bound to fail and another chapter on suicide prevention The author makes important suggestions of how to prevent suicide and lessen suicide rates particularly among the young And lastly a chapter is devoted to the specifics of grief for suicide survivors

### **The Paradox of Trauma**

**and Growth in Pastoral and Spiritual Care** Mary Beth Werdel,2023-10-24 The Paradox of Trauma and Growth in Pastoral and Spiritual Care Night Blooming introduces and bridges the gap between the psychological and spiritual perspectives and responses in trauma work illuminating the complexity of the human phenomenon of growth though suffering that is too easily misunderstood in the context of pastoral and spiritual care Through the hopeful metaphor of night bloomers rare plants that grow because of light but bloom in the darkness it is suggested that while psychological trauma is inherently negative and suffering creates a spiritual inner night moving through it may reveal a new complex reality of the human experience not previously understood We may see ourselves others or the world in a way that is stronger wiser deeper or more brilliant than we had known before The book presents the goal of pastoral and spiritual work is not to extinguish darkness Nor is it to solely focus on the light The work is to learn how to stay awake through the night without glorifying it Such a task is far easier when we believe there might be a rare and uniquely beautiful bloom to stay awake for and that witnessing such a bloom could have great consequences for living a meaningful life

### **The Psychology of Thinking about the Future**
