Kenneth Tan, Jack J. Dongarra, Alfons G. Hoekstra, 2002-04-12 Computational Science is the scientific discipline that aims at the development and understanding of new computational methods and techniques to model and simulate complex systems. The area of application includes natural systems such as biology, environmental and geo sciences, physics and chemistry and synthetic systems such as electronics and financial and economic systems. The discipline is a bridge between classical computer science, logic, complexity, architecture, algorithms, mathematics and the use of computers in the aforementioned areas. The relevance for society stems from the numerous challenges that exist in the various science and engineering disciplines which can be tackled by advances made in this field. For instance new models and methods to study environmental issues like the quality of air, water and soil and weather and climate predictions through simulations as well as the simulation supported development of cars, airplanes and medical and transport systems etc. Paraphrasing R Kenway, R D Kenway, *Contemporary Physics*, 1994. There is an important message to scientists, politicians and industrialists in the future science: the best industrial design and manufacture, the greatest medical progress and the most accurate environmental monitoring and forecasting will be done by countries that most rapidly exploit the full potential of computational science. Nowadays we have access to high end computer architectures and a large range of computing environments mainly as a consequence of the enormous stimulus from the various international programs on advanced computing e.g. *Energy*, 1978, *Congressional Record*, United States, Congress, 1991. The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States, 1789-1824, the Register of Debates in Congress, 1824-1837 and the Congressional Globe, 1833-1873. **Government reports annual index**, 199?
