Nader,1978      **Federal Policy Options for Improving the Education of Low-income Students: Commentaries** Iris C. Rotberg,Kelly Elizabeth Warner,Nancy Rizer,1993 These commentaries make up the second volume of a three part analysis of Chapter 1 of the Elementary and Secondary Act of 1965 the nation s 6 1 billion program for assisting disadvantaged students in primary and secondary schools It draws on 1 a comprehensive review of existing evaluation data on Chapter 1 2 invited commentaries by 91 policymakers researchers and educators teachers principals and administrators describing the strengths and shortcomings of Chapter 1 and 3 a commissioned study of federal options for school finance equalization This volume provides the texts of the invited papers The commentaries are presented exactly as submitted to RAND and have not undergone the customary RAND review procedures The overall study describes a strategy for reformulating the program to encourage fundamental improvements in the quality of education available to low income students It concludes that Chapter 1 does not lead to fundamental educational improvements in low income communities While the program currently benefits selected groups of children particularly by providing remedial instruction it has virtually no effect on overall school quality This is because Chapter 1 as currently funded has not kept pace with the needs in either poor inner city or poor rural schools and because the funds are widely disbursed The study recommends three basic changes in federal policy 1 revise the Chapter 1 funds distribution pattern to provide substantially greater aid per low income child in the districts and schools with the most severe poverty related problems 2 reformulate Chapter 1 to encourage comprehensive improvements in low income schools and 3 provide fiscal incentives that will encourage states to narrow the gap between the expenditure levels of rich and poor school districts
