## **Order In Space A Studio:**

**The Phenomenology of Observation Drawing** Rose Montgomery-Whicher, 2022-09-22 Based on research and grounded in experience this book offers a view into the minds and hearts of people who draw With technology at our fingertips that allows us to record and share what we see within moments drawing seems a remarkably slow and difficult way to make an image And yet drawing from observation continues to be practiced by professional and amateur artists a situation that invites the question What does observation drawing mean in the lives of those who practice it The central chapters of the book explicate the structures of the lived experience of drawing weaving phenomenological reflections into a narrative about the author drawing her sister on a train With lively accounts of drawing from hobbyists art students contemporary and historical artists Montgomery Whicher considers how the act of drawing shapes place time the body and relationships with the world and with others She addresses many facets of drawing including the connection between drawing and thinking the range of emotions felt when drawing a person and the experience of digital drawing Montgomery Whicher concludes that observation drawing warrants a place in general education as well as in the education of artists She argues that drawing will continue to thrive because it is a human practice that deepens and enriches our humanity by giving us access to keener perception greater understanding empathy and wonder This book will be of interest to anyone who has ever wondered about the appeal of drawing including professional and amateur artists philosophers and educators **Complete**

*David Smith in Two Dimensions* Sarah Hamill, 2015-01-31 How does photography shape the way we see sculpture In *David Smith in Two Dimensions* Sarah Hamill broaches this question through an in depth consideration of the photography of American sculptor David Smith 1906 1965 Smith was a modernist known for radically shifting the terms of sculpture a medium traditionally defined by casting modeling and carving He was the first to use industrial welding as a sustained technique for large scale sculpture influencing a generation of minimalists to come What is less known about Smith is his use of the camera to document his own sculptures as well as everyday objects spaces and bodies His photographs of his sculptures were published in countless exhibition catalogs journals and newspapers often as anonymous illustrations Far from being neutral images these photographs direct a pictorial encounter with spatial form and structure the public display of his work *David Smith in Two Dimensions* looks at the sculptor's adoption of unconventional backdrops alternative vantage points and unusual lighting effects and exposures to show how he used photography to dramatize and distance objects This comprehensive and penetrating account also introduces Smith's expansive archive of copy prints slides and negatives many of which are seen here for the first time Hamill proposes a new understanding of Smith's sculpture through photography exploring issues that are in turn vital to discourses of modern sculpture sculptural aesthetics and postwar art In Smith's

photography we see an artist moving fluidly between media to define what a sculptural object was and how it would be encountered publicly

Mathematics of Space George Legendre, 2011-08-29 A new title in the Architectural Design series that explores the potential of computational mathematics in cutting edge design Mathematics has always been a vital tool in the architect's trade but the last fifteen years have seen a sharp rise in the power of computers and has led to computational abilities far beyond anything previously available Modern design software and computing power have changed the traditional role of geometry in architecture and opened up new possibilities enabled by topology non Euclidean geometry and other areas of mathematics With insight from a top notch list of contributors including such notables as Philippe Morel and Fabien Scheurer Mathematics in Space discusses how the advent of computation and information technology has affected the work of contemporary architects This new title in the Architectural Design series updates architectural mathematics since the digital revolution With world class contributors this is an essential resource for anyone interested in the ways computation has transformed the discipline The book explores fascinating issues in modern design most importantly the impact of mathematics on contemporary design creativity For students and practitioners alike Mathematics in Space covers vital topics in a constantly changing discipline

The Construal of Space in Language and Thought Martin Pütz, René Dirven, 2011-07-11 No detailed description available for The Construal of Space in Language and Thought

*Place Meaning and Attachment* Dak Kopec, AnnaMarie Bliss, 2020-03-10 Revolutions have gripped many countries leading to the destruction of buildings places and artifacts climate change is threatening the ancestral homes of many the increasingly uneven distribution of resources has made the poor vulnerable to the coercive efforts by the rich and social uncertainty has led to the romanticizing of the past Humanity is resilient but we have a fundamental need for attachment to places buildings and objects This edited volume will explore the different meanings and forms of place attachment and meaning based on our histories and conceptualization of material artifacts Each chapter examines a varied relationship between a given society and the meaning formed through myth symbols and ideologies manifested through diverse forms of material artifacts Topics of consideration examine place attachment at many scales including at the level of the artifact human being building urban context and region We need a better understanding of human relationships to the past our attachments to the events and places and to the external influences on our attachments This understanding will allow for better preservation methods pertaining to important places and buildings and enhanced social wellbeing for all groups of people Covering a broad range of international perspectives on place meaning from the United States to Europe Asia to Russia and Africa to Australia this book is an essential read for students academics and professionals alike

**The Epic Structure of Space 1999** John K. Balor, 2018-02-18 This book contains transcripts from Online Alpha discussions where the epic and narrative structure of SPACE 1999 is being discussed by comparing episodes with themes characters and elements of plot from the

Homeric Odyssey and Lewis Carroll's stories about Alice The discussion is motivated by questions raised in the scholarly literature and earlier Online Alpha debates about how to make sense of SPACE 1999 from the viewpoint of critical theory The book has been developed on an idealistic basis It is sold at the lowest price the publisher was willing to accept A free e book version can be downloaded at [www.lulu.com](http://www.lulu.com) Keramic Studio Anna B. Leonard, Adelaide Alsop Robineau, 1902 The Journal of the Indian Mathematical Society Indian Mathematical Society, 1928 Golden jubilee commemoration volume 1907 58 Unnumbered 1961 Bulletin of the Board of Standards and Appeals of the City of New York New York (N.Y.).
