

A man and a woman are seen from behind, sitting on a tractor. The man is wearing a brown shirt and glasses, and the woman is wearing a white shirt. They are looking out over a vast, flat landscape under a clear blue sky. In the foreground, there are some wooden structures, possibly part of the tractor or a fence. The overall scene is peaceful and rural.

Oregon Story:

Landscapes of Promise William G. Robbins, 2009-11-23 *Landscapes of Promise* is the first comprehensive environmental history of the early years of a state that has long been associated with environmental protection. Covering the period from early human habitation to the end of World War II, William Robbins shows that the reality of Oregon's environmental history involves far more than a discussion of timber cutting and land use planning. Robbins demonstrates that ecological change is not only a creation of modern industrial society. Native Americans altered their environment in a number of ways, including the planned annual burning of grasslands and light burning of understory forest debris. Early Euro-American settlers who thought they were taming a virgin wilderness were merely imposing a new set of alterations on an already modified landscape. Beginning with the first 18th century traders on the Pacific Coast, alterations to Oregon's landscape were closely linked to the interests of global market forces. Robbins uses period speeches and publications to document the increasing commodification of the landscape and its products. Environment melts before the man who is in earnest wrote one Oregon booster in 1905 reflecting prevailing ways of thinking. In an impressive synthesis of primary sources and historical analysis, Robbins traces the transformation of the Oregon landscape and the evolution of our attitudes toward the natural world.

Landscapes of Conflict William G. Robbins, 2004 William Robbins addresses efforts by individuals and groups within and outside the state to resolve inevitable conflicts between those most concerned for growth and perceived economic stability and those most concerned to preserve the quality of the state's natural resources and the environment in which its citizens live. This is no mistake about it: an important book. Oregon faces massive land use and environmental issues, and this history of how we really got to where we are is relevant and predictive. Those who control how Oregon will go in the future need to read this book thoroughly. And that includes the people who have the most power: the voters. *Salem Statesman Journal*. There is much to admire in this book: careful scholarship, brisk writing, and an obvious love and respect for Oregon's history and people. And many fascinating stories. Historians and environmentalists will be elaborating his themes, working from the borders of his achievement for some time to come. *The Oregonian*. *Landscapes of Conflict* is impressive, a work valuable for its sweep, relevant to many current concerns, and important for the understanding it can provide even to those with interests focused on areas far distant from Oregon. *The Journal of American History*. Robbins brings a critical and moral clarity to his research and analysis that turns the specifics of one state's environmental conflicts into a synecdoche for broader struggles with modernity, capitalism, and ecological sustainability. *H Net*.
