Methods of Laser Spectroscopy Yehiam Prior, Abraham Ben-Reuven, Michael Rosenbluh, 2012-12-06 The Fritz Haber Symposium on Methods of Laser Spectroscopy was held in Ein Bokek Israel on the shores of the Dead Sea on December 16 20 1985 The location is the lowest place on earth 392 meters below sea level It was hoped that 120 active laser scientists so lowly trapped in such a place with the nearest entertainment 100 km away will have no choice but to discuss laser spectroscopy On the average the Dead Sea area receives 3 4 days of rain each year and this year these days all occurred during the conference This did not mean the cancellation of the hikes although the trip to Massada was conducted in the rain The unexpected rains also caused flash floods in the area and Ein Bokek was completely cut off on Thursday night The archeologist scheduled to speak after dinner and the belly dancer scheduled to appear afterwards could not arrive resulting in the only serious deviation from the original plan The scientific program consisted of invited talks and contributed posters The emphasis in selection of invited speakers and topics was on the methods rather than specific molecular systems and an attempt was made to allow ample time for discussion after each lecture The same philosophy guided us in editing this book and authors were requested to write manuscripts longer than usual for standard conference proceedings **An**

Introduction to Laser Spectroscopy David L. Andrews, Andrey A. Demidov, 2002-08-31 Remarkably sustained advances in the development of new lasers and their applications in spectroscopy have prompted this revised and expanded edition of the highly successful *Introduction to Laser Spectroscopy* first published in 1995 In the new edition the editors have preserved the basic concept and structure with the involvement of some new authors all recognized experts in laser spectroscopy Each chapter addresses a different technique providing a review and analysis of the current status and reporting some of the latest achievements With the key formulas and methods detailed in many sections this text represents a practicable handbook of its subject It will be a valuable tool both for specialists to keep abreast of developments and for newcomers to the field needing an accessible introduction to specific methods of laser spectroscopy and also as a resource for primary references The first two chapters lay out the technical details of the main laser systems now employed for spectroscopy and then the principles and applications of absorption and fluorescence measurements Following a description of Raman scattering the development of pump probe techniques is then traced The next chapters deal more specifically with applications of laser induced fluorescence first addressing diagnostics for biochemical systems and then applications to ordered systems The use of tunable infrared lasers for the spectroscopy of transient species is discussed in the next chapter followed by an introduction to optical nonlinearity focusing on its surface applications The utilisation of nonlinear optics for tunable ultraviolet generation is then described and the penultimate chapter gives a description of femtosecond laser ionisation applied in mass spectrometry The book concludes with a survey of the environmental applications of laser remote sensing *Methods of Laser Spectroscopy* Yehiam Prior, 1985 Methods of Laser Spectroscopy 3Island Press, 1986-06-30 Laser Spectroscopy

Nonlinear Laser Spectroscopy V. S. Letokhov, V. P. Chebotayev, 2014-04-18 The laser as a source of coherent optical radiation has made it possible to investigate nonlinear interaction of optical radiation with atoms and molecules Its availability has given rise to new research

fields such as non linear optics laser spectroscopy laser photochemistry that lie at the boundary between quantum electronics and physical optics optical spectroscopy and photochemistry respectively The use of coherent optical radiation in each of these fields has led to the discovery of qualitatively new effects and possibilities in particular some rather subtle effects of interaction between highly monochromatic light and atoms and molecules in optical spectroscopy have formed the bases for certain methods of so called nonlinear laser Doppler free spectroscopy These methods have made it possible to increase the resolution of spectroscopic studies from between 10^{-10} and 10^{-11} limited by Doppler line broadening up to about 10^{-10} at present some laboratories are developing new techniques that have even higher resolution The discovery and elaboration of the methods of nonlinear laser spectroscopy have resulted largely from contributions by scientists from many countries in particular from the USA Massachusetts Institute of Technology Stanford University National Bureau of Standards in Boulder Harvard University etc the USSR P N Levedev Institute of Physics Institute of Semiconductor Physics in Novosibirsk Institute of Spectroscopy etc New Methods in Laser Spectroscopy Frank Victor Kowalski, 1978 Modern methods of laser spectroscopy of molecules in low-temperature media Академия Наук Эстонской ССР.
