Architect's Legal Handbook Anthony Speaight QC, 2021-01-28 The Architect's Legal Handbook is the most widely used reference on the law for practicing architects and the established textbook on law for architectural students. Since the last edition of this book in 2010 the legal landscape in which architecture is practised has changed significantly. The long standing procurement model with an architect as contract administrator has been challenged by the growing popularity of design and build contracts, contract notices in place of certificates and novation of architect's duties. The tenth edition features all the latest developments in the law which affect an architect's work as well as providing comprehensive coverage of relevant UK law topics. Key highlights of this edition include an overview of the legal environment including contract, tort and land law analysis of the statutory framework including planning law, health and safety, construction legislation and building regulations in the post Grenfell legal landscape, procurement and the major industry construction contract forms, building dispute resolution including litigation, arbitration, adjudication and mediation, key fields for the architect in practice including architects registration and professional conduct contracts with clients and collateral warranties, liability in negligence and insurance. Entirely new chapters on various standard form contracts, architects responsibility for the work of others, disciplinary proceedings and data protection tables of cases, legislation, statutes and statutory instruments give a full overview of references cited in the text. The Architect's Legal Handbook is the essential legal reference work for all architects and students of architecture.

Architect's Legal Handbook Anthony Speaight KC, Matthew Thorne, 2025-04-16 Celebrating 50 years since it was first published, the Architect's Legal Handbook has been the most widely used reference on the law for practicing architects and the established textbook on law for architectural students. Since the last edition of this book in 2021, unprecedented change has occurred in the construction sector. The withdrawal of the United Kingdom from the European Union has ushered in changes to legislation in a wide range of areas. The tragic fire at Grenfell Tower in June 2017 and the deficiencies in design, construction and regulation within the sector that were revealed as a result have given rise to major changes in the way projects are now carried out. An overhaul of the Building Regulations and the creation of a new Building Safety Regulator are only some of the ways in which the landscape has changed. This eleventh edition features all the latest developments in the law which affect an architect's work as well as providing comprehensive coverage of relevant UK law topics. Key highlights of this edition include: A new chapter has been added to cover the statutory framework for building safety; Chapter 9, which is complemented by a wholly updated chapter on construction regulation in England and Wales; Chapter 10, The chapter on public procurement law; Chapter 14 has also been entirely rewritten to focus on the Public Procurement Act 2023 and related regulations following Brexit. New suites of standard contract forms have since the last edition been issued. These have seen substantial changes with chapters on JCT 2024 Chapter 18 and the latest NEC4 forms Chapter 19, together with wider updates to the chapters on FIDIC Chapter 20 and other forms of contract Chapter 21. A

revised chapter on architects contracts with clients covering the RIBA Professional Services Contract 2024 Chapter 37 A new section on novations in the chapter on the English Law of Contract Chapter 2 The Architect's Legal Handbook is the essential legal reference work for all architects and students of architecture
