*Critical Marxism in Mexico* Stefan Gandler, 2015-09-01 In Critical Marxism in Mexico Stefan Gandler coming from the tradition of the Frankfurt School reveals the contributions that Adolfo Sánchez Vázquez and Bolívar Echeverría have made to universal thought. While in recent times Latin America has taken its distance from global power centers and reorganized its political and economic relations in philosophy, the same tendency is barely visible. Critical Marxism in Mexico is a contribution to the reorganization of international philosophical discussion with Critical Theory as the point of departure. Despite having studied in Europe where philosophical Eurocentrism remains virulent, Gandler opens his eyes to another tradition of modernity and offers an account of the life and philosophy of Adolfo Sánchez Vázquez and Bolívar Echeverría, former senior faculty members at the Universidad Nacional Autónoma de México UNAM. Gloria Fraser Giffords,2022-08-23 Over nearly three centuries Jesuit Franciscan and Dominican missionaries built a network  
of churches throughout the new world of New Spain Since the early twentieth century scholars have studied the colonial  
architecture of southern New Spain but they have largely ignored the architecture of the north However as this book clearly  
demonstrates the colonial architecture of Northern New Spain an area that encompasses most of the southwestern United  
States and much of northern Mexico is strikingly beautiful and rich with meaning After more than two decades of research  
both in the field and in archives around the world Gloria Fraser Giffords has authored the definitive book on this architecture  
Giffords has a remarkable eye for detail and for images both grand and diminutive Because so many of the buildings she  
examines have been destroyed she sleuthed through historical records in several countries and she discovered that the  
architecture and material culture of northern New Spain reveal the influences of five continents As she examines objects as  
large as churches or as small as ornamental ceramic tile she illuminates the sometimes subtle sometimes striking influences  
of the religious social and artistic traditions of Europe from the beginning of the Christian era through the nineteenth  
century of the Muslim countries ringing the Mediterranean from the seventh through the fifteenth centuries and of Northern

devoted partly to the history of Brazilian literature from the earliest writing through the colonial period and the Portuguese  
language traditions of the nineteenth and twentieth centuries and partly also to an extensive bibliographical section in which

Much engagement with the cathedral music of New Spain has been through lens of exoticism This book challenges this view by uncovering how colonial repertoires mixed European aesthetics with locally composed pieces to create canons both tailored to local liturgies and shaped by European tradition Building upon material from the archives of Mexico City Durango and Puebla cathedrals author Drew Edward Davies examines how composers some of them priests communicated theological doctrine through music genres The book also offers a new understanding of cultural encounter both by assessing how music was used for indoctrination and by rethinking stereotypes in villancicos through the lens of topic theory Illuminating the unique mix of devotional subjects stressed in New Spain Davies argues that topicality rather than style differentiated New Spanish musical repertory from that of Europe Concluding with a history of the early music movement s revival of New Spanish music beginning in the 1960s Davies suggests that exoticism and the imagination continue to shape performances in ways that may not be plausible historically but nonetheless resonate with audiences in the contemporary world In so doing he invites performers and scholars alike to engage with broader repertoires of New Spanish music moving forward
