**All to Think** Dr. Muriel Gerhard,2017-03-24 It just happened There they were Shouting Put it in a book The research is  
 significant The magazine Grade Teacher devoted the whole issue to the research What is significant is that we can teach for  
 thinking We can improve our pupil s cognitive skills be they decision making creativity analysis problem solving inductive  
 and deductive reasoning as well as concept development to mention just a few It all began when I had given a presentation at  
 the ASCD convention addressing over 500 educators following a nine year study on inquiry and cognitive centered teaching  
 funded by The Ford Foundation and now found myself mobbed by publishers to PUT IT IN A BOOK The book was written in  
 ten weeks and it sold and sold and sold one hundred thousand copies and was translated into many foreign languages This  
 resulted in teaching pupils at all grade levels to process information to develop conceptual frameworks and in depth  
 understanding of the content in all disciplines be it mathematics the sciences the social science music and the arts Learners  
 developed and grew concepts and conceptual frameworks and really understood the material as opposed to mouthing  
 memorized sequences of words Let me show you what I am trying to convey I visited a first grade class and there they were  
 singing praises to TWO chanting One and One is TWO Then it happened One little boy raised his hand and blurted out What s  
 a two We live in a conceptual world Whether we are teaching kindergarten children their ABCs or graduate students  
 advanced mathematics we must teach so that they truly understand what they are talking about so that they can develop  
 concepts simple concepts first and then more intricate concepts That my friends is what learning is all about My career has  
 spanned over sixty years spent examining researching developing writing and teaching various methods teachers can use to  
 educate our children more effectively So here it is an updated version of the original book designed for the digital age and  
 our digital destiny providing our new generation with the critical cognitive skills to deal with a very challenging future The  
 processes and strategies are clearly delineated and applicable to every discipline at every level of instruction These have  
 been researched and evaluated In sum the world has become far more complex than any of us as educators could have  
 envisioned We are being deluged with the new the unknown We will need thinkers and problem solvers Teach them all to
