Thomas Prendergast,1884 *Second Language Learning Data Analysis* Susan M. Gass,Antonella Sorace,Larry
Selinker,2013-05-13 The purpose of this workbook is to provide students with practice in analyzing second language data For
the student of second language learning hands on experience with actual data is essential in understanding the processes
involved in learning a second language Working through exemplars of the kinds of interlanguages that learners do and do not
create brings about a clearer understanding of the principles underlying these interlanguages as well as the universal
principles of language learning those that are independent of particular languages and interlanguages The goal in this
workbook is to present data organized in such a way that by working through pedagogically presented data sets students are
led to a discovery and understanding of theoretical and or methodological issues In addition they acquire the ability to
interpret data and to begin to draw conclusions from them The authors intend that students should go from the data to a
conclusion that includes a 3 part statement what else you should want to know about these data why this specifically and not
something else and how one can empirically research what you want to find out This sequence of questions forces students to
constantly keep in mind the important question of falsification What kind of data would it take to falsify the particular
conclusions the students come to As with the earlier edition of this workbook Sorace Gass a three part set workbook manual
