Trotter,2020-04-15 In More Than Medicine LaTonya J Trotter chronicles the everyday work of a group of nurse practitioners NPs working on the front lines of the American health care crisis as they cared for four hundred African American older adults living with poor health and limited means Trotter describes how these NPs practiced an inclusive form of care work that addressed medical social and organizational problems that often accompany poverty In solving this expanded terrain of problems from inside the clinic these NPs were not only solving a broader set of concerns for their patients they became a professional solution for managing difficult people for both their employer and the state Through More Than Medicine we discover that the problems found in the NP s exam room are as much a product of our nation s disinvestment in social problems as of physician scarcity or rising costs Advanced Practice Nursing Michaelene P. Jansen,Mary Zwygart-Stauffacher,2009-10-26 Designated a Doody s Core Title This is a valuable resource to help prepare advanced practice nurses with the skills necessary to navigate the healthcare arena The editors and contributors are experienced advanced practice nurses with valuable information to share with novice practitioners Score 100 5 stars Doody s Medical Reviews Now in its fourth edition this highly acclaimed book remains the key title serving graduate level advanced practice nurses APNs and recent graduates about to launch their careers The book outlines what is required of the APN with guidelines for professional practice for each of the four APN roles the nurse practitioner clinical nurse specialist certified nurse midwife and certified registered nurse anesthetist Advanced Practice Nursing focuses not only on the care and management of patients but also on how to meet the many challenges of the rapidly changing health care arena Obtaining certification navigating reimbursement and translating research into practice are just a few of the challenges discussed Key Features Essential information on educational requirements and certification Advice on how to make the transition into professional practice Guidelines for ethical and clinical decision making Discussions on the DNP and CNL roles in AP nursing Updated and revised content on leadership development regulation informatics health care organization and health care policy **A Career As a Nurse Practitioner** Institute For Institute For Career Research,2015-08-06 IF YOU ARE INTERESTED IN NURSING as a career and have been learning about this wonderful profession you may have come across the term Nurse Practitioner This is an advanced level of nursing that has been around for a relatively short period of time since 1965 It requires additional education training and certification beyond what you need in order to become a registered nurse RN In fact the usual education track toward becoming a nurse practitioner is to first become an RN Although there are many tasks that both NPs and RNs perform there are significant differences When you achieve your nurse practitioner certification you can do things that registered nurses are not trained to do notably prescribing and managing medications and other therapies and referring patients to other health professionals The training for nurse practitioners is similar in many ways to the training that doctors receive Both learn how to diagnose

health problems determine the appropriate treatment and then administer that treatment Like doctors many nurse practitioners specialize working with a specific age group children adults or seniors or in a particular area of medicine such as oncology psychiatry or gastrointestinal Training and practice of NPs focus on prevention and wellness maintenance and they generally are considered to take a more holistic approach than do doctors do Nurse practitioners are sometimes confused with physician assistants PAs because they often perform similar tasks such as taking patient histories conducting diagnostic tests assisting in surgical procedures and offering counseling and health education to patients PAs receive national certification and may hold bachelor s or even master s degrees But as with registered nurses there is a critical difference PAs must work under the supervision of a physician while nurse practitioners can in many instances work independently of a doctor Many NPs operate their own practices without the presence of a supervising physician This is currently the case in more than a dozen states and more states are permitting this each year The demand for primary care health services is growing and there are simply not enough family doctors to fill the need nor are there expected to be enough for many years to come This is especially true in rural America as well as in the poorer sections of urban America This new Careers Ebook contains a wealth of unbiased information about an occupational field based on the latest national surveys Careers Ebooks cover attractive and unattractive sides opportunities education necessary personal qualifications required earnings descriptions of different job specialties first person accounts by those in the field and how to get started including practical advice on what to do now There are live links to schools and colleges associations periodicals and other sources of reliable information
