The book includes diagrams and workings where necessary to ensure pupils understand how to present their answers as well as photocopiable worksheets at the back of the book. Also available from Galore Park www.galorepark.co.uk Mathematics Year 6 Mathematics Year 5 Mathematics Year 5 Answers 11 Maths Practice Exercises 11 Maths Revision Guide 10 Minute Maths Tests Workbook Age 8 10 10 Minute Maths Tests Workbook Age 9 11 Mental Arithmetic Workbook Age 8 10 Mental Arithmetic Workbook Age 9 11 *Maths Problem Solving* Catherine Yemm, 2006-01 Maths Problem Solving Year 6 is the sixth book in a six book series that has been written for teachers to use during the numeracy lesson. It covers the solving problems objectives from the Numeracy Framework. The book contains photocopiable resources organized into three chapters making decisions reasoning about numbers or shapes problems involving real life money or measures. Each chapter contains six lessons one for each half term. There are three differentiated worksheets in each chapter making it easy to use the book in a mixed ability classroom. The length of the problems are varied with short medium and more extended problems for children to solve. The problems on each page are mixed so the children do not assume that the solution process is the same each time but have to understand the problem. They are varied in their complexity and are presented in a meaningful age appropriate manner with topics the children will find relevant.

Mental Maths Strategies Alan Parker, 2004 Mental Maths is the maths we do in our heads without the use of calculators and without writing down the calculation. Mental Maths strategies are the tricks we use to do Maths in our heads. There are different ways of finding the answer to any Mental Maths problem and such strategies are the focus of this series. Even though calculators and computers play an enormous role in the modern world we still need to go back to the basics. We do need to know how to check that the sales assistant at the counter is giving us the right change. Mental Maths has become more important than ever and new primary Maths syllabuses in Australia are reflecting this. For example NSW has placed an emphasis on Mental Maths in its primary syllabus and even the Year 10 School Certificate examination has a compulsory non calculator section. Features of this book include 32 double page units of Mentals are included. 8 units for each school term each unit is divided into four sets A B C and D of 20 questions each. Each numbered question covers particular Maths topics throughout the book. For example Question 1 always covers addition while Question 20 always covers geometry. A special eHelp section at the front of the book gives different strategies and explanations to help students solve Mentals problems. These are also numbered so they link to the question numbers in each Maths unit. A eFun Spot unit containing fun activities and a eRevision unit are included at the end of each 8 units extra practice sections which reinforce particular strategies appear in the lower part of each page. Answers to all questions are in a lift out section in the centre of the book.
