Nursing The Philosophy And Science Of Caring:

Nursing Jean Watson, 2008-05-31 Jean Watson's first edition of *Nursing* now considered a classic introduced the science of human caring and quickly became one of the most widely used and respected sources of conceptual models for nursing. This completely new edition offers a contemporary update and the most current perspectives on the evolution of the original philosophy and science of caring from the field's founding scholar. A core concept for nurses and the professional and non-professional people they interact with, care is one of the field's least understood terms enshrouded in conflicting expectations and meanings. Although its usages vary among cultures, caring is universal and timeless at the human level transcending societies, religions, belief systems, and geographic boundaries, moving from Self to Other to community and beyond, affecting all of life. This new edition reflects on the universal effects of caring and connects caring with love as the primordial moral basis both for the philosophy and science of caring practices and for healing itself. It introduces Caritas Processes, offers centering and mediation exercises on an included audio CD, and provides other energetic and reflective models to assist students and practitioners in cultivating a new level of Caritas Nursing in their work and world. *Nursing* Jean

Watson, 1979 Unitary Caring Science Jean Watson, 2018-07-16 *Unitary Caring Science: The Philosophy and Praxis of Nursing* takes a profound look at conscious, intentional, reverential caring/healing as sacred practice/praxis and as a necessary turn for survival. Jean Watson posits Unitary Caring Science for the evolved Caritas-conscious practitioner and scholar. A detailed historical discussion of the evolution from Caring Science toward Unitary Caring Science reflects the maturing of the discipline, locating the nursing phenomena of wholeness within the unitary field paradigm. An exploration of praxis as informed moral practice results in an expanded development of the ten Caritas processes, resulting in a comprehensive value guide to critical Caritas literacy and ontological Caritas praxis. Watson writes for the Caritas-Conscious Nurse™ or the Caritas-Conscious Scholar/Practitioner/Educator on the journey toward the deeper caring/healing dimensions of life. Unitary Caring Science offers a personal/professional path of authenticity, bringing universals of Love, Energy, Spirit, Infinity of Purpose, and Meaning back into nurses' lives and their life's work. Unitary Caring Science serves as a continuing, evolving message to the next generation of nurse scholars and healing health practitioners committed to a praxis informed by mature disciplinary consciousness.
