Nutrition and Diet Therapy in Gastrointestinal Disease Martin H. Floch, 2013-11-21 A physician with a broad consultative practice Dr Floch combines his clinical experience with a zeal for exploring what has been written by others Chief of Medicine at the Norwalk Hospital for the past decade and still an active consulting gastroenterologist Dr Floch has given us a volume which every clinician dealing with digestive disorders will want to have at his or her desk Not everyone will agree with all that Dr Floch has prescribed in the way of detailed dietary help for

the common afflictions of mankind's gut but in this book the reader can get at the background of the controversy. All clinicians have had problems in assessing when to use elemental diets, how to apply advances in peripheral and intravenous alimentation and in many other matters which are discussed in detail in this fine volume. Dr Floch displays what is available in dietary therapy, evaluates the nutritional inadequacies surrounding most digestive disturbances and calmly evaluates competing claims. He gives a brief overview of gastrointestinal physiology pertaining to an understanding of nutritional complications as well as the genesis of the major gastrointestinal disorders. In this sense his book can be read as a mini physiological text. I am delighted to have this book in our gastrointestinal series and I hope that the reader will profit from it as much as I have.

Cases on Medical Nutrition Therapy for Gastrointestinal Disorders Aljaaly, Elham Abbas, Khalifa, Nahlaa Abdelwahab, Naaman, Rouba Khalil, Bakhsh, Manar Abduljalil, 2020-11-06. Medical nutrition therapy plays a central role in the management of diseases including reducing disease risk, slowing disease progression and monitoring nutritional status. Though a nutrition care process has been implemented in some countries, many do not have a national standard for nutrition and dietetic practices for different diseases including the scope of gastrointestinal disorders. Moreover, there is no guidance to dietetic practice by most of the governing bodies of the world. *Cases on Medical Nutrition Therapy for Gastrointestinal Disorders* presents real world case studies on nutrition assessment, diagnosis, intervention, monitoring and evaluation standards and practices. Moreover, the cases provide critical updates on the use of medical nutrition therapy for gastrointestinal disorders that include but are not limited to Celiac Disease, Crohn's Disease, Irritable Bowel Syndrome, constipation and bowel obstructions and discusses strategies for the prevention and management of these disorders. Registered dietitians, dietetic interns, nutritionists, healthcare professionals, researchers, academicians and students will benefit from the scenarios presented within this book.
