Upwind and High-Resolution Schemes M.Yousuff Hussaini,Bram van Leer,John Van Rosendale,2012-12-06 One of the major achievements in computational fluid dynamics has been the development of numerical methods for simulating compressible flows combining higher order accuracy in smooth regions with a sharp oscillation free representation of embedded shocks methods and now known as high resolution schemes Together with introductions from the editors written from the modern vantage point this volume collects in one place many of the most significant papers in the development of high resolution schemes as occurred at ICASE Elliptic Marching Methods and Domain Decomposition Patrick J.

Roache,1995-06-29 One of the first things a student of partial differential equations learns is that it is impossible to solve elliptic equations by spatial marching This new book describes how to do exactly that providing a powerful tool for solving problems in fluid dynamics heat transfer electrostatics and other fields characterized by discretized partial differential equations Elliptic Marching Methods and Domain Decomposition demonstrates how to handle numerical instabilities i e limitations on the size of the problem that appear when one tries to solve these discretized equations with marching methods The book also shows how marching methods can be superior to multigrid and pre conditioned conjugate gradient PCG methods particularly when used in the context of multiprocessor parallel computers Techniques for using domain decomposition together with marching methods are detailed clearly illustrating the benefits of these techniques for applications in engineering applied mathematics and the physical sciences *Biomedical Image Segmentation* Ayman
