Methods for Computer Design of Diffractive Optical Elements Soifer, 2002-03-01      *Methods for Computer Design of Diffractive Optical Elements* Victor A. Soifer, 2002 The first inclusive book on the cutting edge field of modern optics and its applications For the first time all the major aspects of designing planar DOEs are covered in one book comprised of original methods developed by experts at the Russian Academy of Sciences Image Processing Systems Institute The breadth of *Methods for Computer Design of Diffractive Optical Elements* covers DOE production beginning from the design techniques and the software to the fabrication technology experimental studies and testing of DOEs including all major DOE application fields and DOE types The contributors also detail the three key approaches to designing phase DOEs a geometric optics ray tracing method the scalar diffraction Kirchhoff method and the rigorous design based on electromagnetic theory *Methods for Computer Design of Diffractive Optical Elements* is an estimable reference for experts in the aerospace industry research and development institutes the automobile industry as well as students and university professors      *Interactive Methods For Diffractive Optical Elements Computation* Victor A. Soifer, V Kotlar, L. Doskolovich, 1997-05-08 This high level monograph for the optics research market explores a large number of novel interactive methods and algorithms for calculating the transmission function of phase diffractive optical elements The text includes accounts of well established methods and algorithms for calculating DOEs but its major contribution is to include current methods and examine the theoretical and practical aspects of synthesising optical components All the methods discussed in this book have been verified by their numerical simulation A fast fourier transform algorithm presents computational basis of all the methods considered A portion of the algorithms have received a comparative study in terms of their suitability for solving the same problem For a number of the interactive algorithms a rigorous proof to their convergence is given      **Computer Design of Diffractive Optics** V A Soifer, 2012-11-19 Diffractive optics involves the manipulation of light using diffractive optical elements DOEs DOEs are being widely applied in such areas as telecommunications electronics laser technologies and biomedical engineering Computer design of diffractive optics provides an authoritative guide to the principles and applications of computer designed diffractive optics The theoretical aspects underpinning diffractive optics are initially explored including the main equations in diffraction theory and diffractive optical transformations Application of electromagnetic field theory for calculating diffractive gratings and related methods in micro optics are discussed as is analysis of transverse modes of laser radiation and the formation of self replicating multimode laser beams Key applications of DOEs reviewed include geometrical optics approximation scalar approximation and optical manipulation of micro objects with additional consideration of multi order DOEs and synthesis of DOEs on polycrystalline diamond films With its distinguished editor and respected team of expert contributors *Computer design of diffractive optics* is a comprehensive reference tool for professionals and academics working in the field of optical engineering and photonics Explores the theoretical aspects underpinning diffractive optics Discusses

key applications of diffractive optical elements A comprehensive reference for professionals and academics in optical engineering and photonics     Diffractive Nanophotonics Victor A Soifer,2016-04-19 Diffractive Nanophotonics demonstrates the utility of the well established methods of diffractive computer optics in solving nanophotonics tasks It is concerned with peculiar properties of laser light diffraction by microoptics elements with nanoscale features and light confinement in subwavelength space regions Written by recognized experts in t     *Diffractive Optics* Donald C. O'Shea,2004 This book provides the reader with the broad range of materials that were discussed in a series of short courses presented at Georgia Tech on the design fabrication and testing of diffractive optical elements DOEs Although there are not long derivations or detailed methods for specific engineering calculations the reader should be familiar and comfortable with basic computational techniques This text is not a cookbook for producing DOEs but it should provide readers with sufficient information to assess whether this technology would benefit their work and to understand the requirements for using the concepts and techniques presented by the authors     Advanced Topics in Optoelectronics, Microelectronics, and Nanotechnologies Ovidiu Iancu,Adrian Manea,Dan Cojoc,2003     **Optical Technologies for Telecommunications** ,2005 Issues for 2004 contain reports from the 5th conferences     *Laser Beam Shaping* ,2001     **Wave-optical Systems Engineering** ,2003     *Photon Management* ,2004     *Spinoff* ,     *Diffractive and Holographic Optics Technology* ,1996     **Design and Analysis of Diffractive Optical Elements for Beamshaping of Gaussian Profiles and Emission from Multimode of VCSELs and RCLEDs** John Stuart Hoch,1996     *Diffractive and Holographic Optics Technology III* Ivan Cindrich,Sing H.
