Methods Of Mysticism:

The Methods of Science and Religion Tiddy Smith, 2019-07-05 Tiddy Smith argues that the conflict between science and religion is ultimately a disagreement about what kinds of methods we should use for investigating the world. Specifically, scientists and religious folk disagree over which belief-forming methods are reliable. In the course of justifying any scientific claim, scientists typically appeal to methods which generate agreement between independent investigators and which converge on the same answers to the same questions. In contrast, religious claims are typically justified by methods which neither generate agreement nor converge in their results, for example, dreams, visions, mystical experiences, etc. This fundamental difference in methodologies can neatly account for the conflict between science and religion. *Methods of Private Religious Living* Henry Nelson Wieman, 1929 **The Fields and Methods of Knowledge** Raymond Frank Piper, Paul William Ward, 1929 *The Psychology of Religious Mysticism* James Henry Leuba, 1925 *Mysticism* Evelyn Underhill, 1919 *The Theory and Practice of Mysticism* Charles Morris Addison, 1918 **Mysticism and the Modern Mind** Alfred P. Parsons, 2011-12-16 The term mysticism has never been consistently defined or employed, either in religious traditions or in academic discourse. The essays in this volume offer ways of defining what mysticism is, as well as methods for grappling with its complexity in a classroom. This volume addresses the diverse literature surrounding mysticism in four interrelated parts. The first part includes essays on the tradition and context of mysticism, devoted to drawing out and examining the mystical element in many religious traditions. The second part engages traditions and religious-cultural strands in which mysticism is linked to other terms such as shamanism, esotericism, and Gnosticism. The volume's third part focuses on methodological strategies for defining mysticism with respect to varying social spaces. The final essays show how contemporary social issues and movements have impacted the meaning, study, and pedagogy of mysticism. *Teaching Mysticism* presents pedagogical reflections on how best to communicate mysticism from a variety of institutional spaces. It surveys the broad range of meanings of mysticism, its utilization in the traditions, the theories, and methods that have been used to understand it, and provides critical insight into the resulting controversies.
