

THE MEASUREMENT OF ROUNDWOOD

METHODOLOGIES AND CONVERSION RATIOS

M.A. Fonseca,

United Nations Economic Commission for Europe,
Trade and Timber Branch, Geneva, Switzerland

For those that are involved in the trade, processing and harvest of roundwood, understanding volume determination, conversion ratios and product recovery is critical. This information is also important for government agencies such as forest services, trade organizations, statistical reporting entities and researchers.

This comprehensive volume provides hard-to-find information and instructions on the many methods by which roundwood and the products of roundwood are measured.

This includes: log scales and rules used in the world today; roundwood weight-to-volume averages and physical properties for more than 400 timber species found worldwide; general information on log grading, log manufacturing quality, sampling and extrapolation procedures and methods for determining log yard inventory and mill log usage volume. Finally, all facets of product recovery are presented with many detailed tables and graphs. The book will be invaluable for those in the forest and forest products industries, and will serve as a reference textbook for students of these disciplines.

"The author has done an admirable job of systematically summarizing a plethora of information on measuring roundwood. This comprehensive volume is sure to be invaluable to students and practitioners in forestry and forest products industries."

Harold E. Burkhardt, Virginia Tech, USA

Metrics Of Roundwood Measuring Methodologies And Conversion Ratios

M Lipman

Metrics Of Roundwood Measuring Methodologies And Conversion Ratios:

The Measurement of Roundwood Matthew A. Fonseca, 2005 The ability to measure roundwood quantity and quality and predict product yields is of great importance to forest industries However roundwood metrics is a topic that is often difficult to understand due to counterintuitive trends inconsistencies and variability in a number of factors This book provides a comprehensive guide to the various methods by which roundwood and the products of roundwood are measured It presents and compares many different log scaling methods in terms of procedures and conversion ratios Other topics covered include grading logs log manufacturing quality statistical sampling methods for determining log yard inventories and mill log usage volume Detailed tables of data are presented for the main commercial timber species of the world **Forest Policy,**

Economics, and Markets in Zambia Philimon Ng'andwe, Jacob Mwitwa, Ambayebe Muimba-Kankolongo, 2015-08-20 This book is the result of over ten years of field research across Zambia It covers the production and diverse uses of wood and non wood forest products in different parts of Zambia Although a short format it is a multi contributed work It starts an overview of the forestry sector and covers more specific areas like production markets and trade of wood and non wood products the role of non wood forest products in the livelihood of the local population the contribution of the forestry sector to Zambia s overall economy and reviews of efforts to strategically utilize these resources for local economic and sustainable development A concise reference to understand key wood products market dynamics and role of forests in a developing nation A useful guide for corporations consultants NGOs and international research organizations involved with sustainable development in Zambia as well as other nations in the SADC **Forest Inventory: Statistics of forest inventory and**
