The Science and Politics of Race in Mexico and the United States, 1910-1950 Karin Alejandra Rosemblatt, 2018-03-13 In this history of the social and human sciences in Mexico and the United States Karin Alejandra Rosemblatt reveals intricate connections among the development of science the concept of race and policies toward indigenous peoples Focusing on the anthropologists sociologists biologists physicians and other experts who collaborated across borders from the Mexican Revolution through World War II Rosemblatt traces how intellectuals on both sides of the Rio Grande forged shared networks in which they discussed indigenous peoples and other ethnic minorities In doing so Rosemblatt argues they refashioned race as a scientific category and consolidated their influence within their respective national policy circles Postrevolutionary Mexican experts aimed to transform their country into a modern secular state with a dynamic economy and central to this endeavor was learning how to manage racial difference and social welfare The same concern animated U S New Deal policies toward Native Americans The scientists border crossing conceptions of modernity race evolution and pluralism were not simple one way impositions or appropriations and they had significant effects In the United States the resulting approaches to the management of Native American affairs later shaped policies toward immigrants and black Americans while in Mexico officials rejected policy prescriptions they associated with U S intellectual imperialism and racial segregation *Coloquio internacional "Los Indígenas de México en la época prehispánica y en la actualidad"* Maarten Evert Reinoud Gerard Nicolaas Jansen, 1982 **México indígena**, 2002 **Indigenismo in Mexico** Joan Miller, 1960 *Mexico and Its Heritage* Ernest Gruening, 1928 *Report on Education in Mexico* Mexico. Secretaría de Educación Pública, 1990 **Indigenous Mexican Migrants in the United States** Jonathan Fox, Gaspar Rivera-Salgado, 2004 The multiple pasts and futures of the Mexican nation can be seen in the faces of the tens of thousands of indigenous people who each year set out on their voyages to the north as well as the many others who decide to settle in countless communities within the United States To study indigenous Mexican migrants in the United States today requires a binational lens taking into account basic changes in the way Mexican society is understood as the twenty first century begins This collection explores these migration processes and their social cultural and civic impacts in the United States and in Mexico The studies come from diverse perspectives but they share a concern with how sustained migration and the emergence of organizations of indigenous migrants influence social and community identity both in the United States and in Mexico These studies also focus on how the creation and re creation of collective ethnic identities among indigenous migrants influences their economic social and political relationships in the United States of California Santa Cruz **Nombres geograficos indigenas del estado de Mexico** Cecilio Agustín Robelo, 1900 *Mexico's Struggle for Rural Education, 1910-1950* Ramón Eduardo Ruiz, 1954 **Language Planning and Policy in Latin America** Richard B. Class, Ethnicity, and Community in Southern Mexico Colin G. Clarke,2000 The state of Oaxaca has been studied intensively by archaeologists historians and anthropologists but this is the first comprehensive overview of rural communities in the twentieth century The study is rooted in the colonial and post independence periods but the text concentrates primarily on the post revolutionary period and on the land reform which allowed peasantries to be reconstituted in the lowland areas of the state as a complement to the traditional peasantries which still existed on communal lands at high altitudes Peasant lifestyles and production systems are examined in particular to distinguish between those activities which are subsistence orientated and those which are geared to the market In the last thirty years rural life has been transformed by improved communications and by services provided by the federal state but above all by migration to Oaxaca City other Mexican cities and the USA The outcome has been the emergence of class differences at the level of the community the development of ethnic identities based on language and regional differences and the emergence of opposition to the hegemony of the party of government the PRI The wide range of issues under discussion will make this volume of interest to geographers historians anthropologists and those involved in development studies
