Miami Metro The Road To Urban Unity:

Miami Metro Reinhold Paul Wolff, 1960 Sequel to Suburbia Nicholas A. Phelps, 2015-12-09 How the decentralized automobile oriented and fuel consuming model of American suburban development might change In the years after World War II a distinctly American model for suburban development emerged The expansive rings of outer suburbs that formed around major cities were decentralized and automobile oriented an embodiment of America's postwar mass production mass consumption economy But alternate models for suburbia including transit oriented development smart growth and New Urbanism have inspired critiques of suburbanization and experiments in post suburban ways of living In *Sequel to Suburbia* Nicholas Phelps considers the possible post suburban future offering historical and theoretical context as well as case studies of transforming communities Phelps first locates these outer suburban rings within wider metropolitan spaces describes the suburbs as a spatial fix for the postwar capitalist economy and examines the political and governmental obstacles to reworking suburban space He then presents three glimpses of post suburban America looking at Kendall Dadeland in Miami Dade County Florida Tysons Corner in Fairfax County Virginia and Schaumburg Illinois near Chicago He shows Kendall Dadeland to be an isolated New Urbanism success describes the re planning of Tysons Corner to include a retrofitted central downtown area and examines Schaumburg's position as a regional capital for Chicago's northwest suburbs As these cases show the reworking of suburban space and the accompanying political process will not be left to a small group of architects planners and politicians Post suburban politics will have to command the approval of the residents of suburbia
