the therapeutic relationship between analyst and patient Although Rank is now widely acknowledged as the most important precursor of humanistic and existential psychotherapy influencing such well known writers as Carl Rogers Rollo May and Ernest Becker Rank's knotty prose has long frustrated readers In this volume of Rank's lectures Robert Kramer has brought together for the first time the innovator's clearest explanations of his most influential theories The lectures were delivered in English to receptive audiences of social workers therapists and clinical psychologists throughout the United States from 1924 to 1938 the year before Rank's untimely death The topics covered include separation and individuation projection and identification love and will relationship therapy and neurosis as a failure in creativity The lectures reveal that Rank much maligned by orthodox analysts invented the modern object relations approach to psychotherapy in the 1920s In his introduction based on private correspondence between Rank Freud and others in the inner circle Robert Kramer tells the full story of why Rank parted ways with Freud The collection of lectures constitutes a readable Rank filled with insights still relevant today for those interested in the humanistic existential or object relational aspects of psychotherapy or in the development of the psychoanalytic movement
