

Our Dynamic Society

Mikhail Viktorovich Anichkov

Our Dynamic Society:

The Laws of History Graeme Snooks,2002-09-26 This is an original and controversial reflection on the course of human history and a remarkable attempt to develop a scientific model of laws for the social sciences It considers the nature of laws and the reasons we might expect to find them in history employs an underlying framework concerning societal dynamics historical change and institutional change which are in fact the laws of history This volume consolidates the author s previous research in The Dynamic Society and The Ephemeral Civilization

Longrun Dynamics G. Snooks,1998-04-08 Longrun

Dynamics is a ground breaking work that begins where the author s Economics without Time 1993 left off It employs the inductive method proposed by J S Mill to develop a general dynamic theory that integrates the separate disciplines of economic growth economic fluctuations and political decision making The central feature of this general theory is dynamic demand which provides both a realist form for the model and a new explanation of macroeconomics variables The general theory also provides an entirely new basis for policy and is designed to counter the influence of neo liberalism in economic theory
