**Richard Rorty and the Problem of Postmodern Experience** Tobias Timm, 2019-07-05 Richard Rorty perhaps the most important philosopher of the past century refused to write meaningfully about experience due to his postmodern inclination to associate experience with a belief in objectivity and foundational truths Richard Rorty and the Problem of Postmodern Experience A Reconstruction explores the context reasoning and consequences of this resistance While for much of our history experience was valued for its potential to teach us about the world Rorty and his fellow postmodern thinkers encouraged us to doubt the narrative that we can use experience to make epistemological progress Rather than pursue universal truths about the world Rorty suggested that we recognize all of our beliefs about the world as being social constructions In his project to recover a concept of experience from within the framework Rorty has constructed Tobias Timm describes how classical pragmatist theories of experience are na ve about the problem of foundationalism He also explains how the most common phenomenological work lacks an active subject experience here is simply something that happens to us rather than something we actively seek to improve Timm demonstrates that despite Rorty s insistence that we talk about language instead of experience there are strong experiential elements in his work Rorty s romanticism and his optimism about the accomplishments of western culture are remedial to the pessimism of postmodern discussions about experience

**Ideology, Discourse, and School Reform** Zeus Leonardo, 2003-10-30 Leonardo introduces an integrated theory of ideology that examines its necessary negative and positive functions A three dimensional theory highlights the concept of ideology during the reform process and links it to domination Through an ideological critique of reform language the book provides insights into domination and ways to counteract it The movement for educational change lacks a concerted engagement with ideology with respect to school reform Ideology is a central structuring concept in education especially regarding the intractable problem of domination Race class and gender inequalities have become dilemmas that plague many students chances for academic success let alone the good life In addition to constructing ideology as a form of distortion the book considers it as a necessary mechanism for teachers as they make meaning of their daily experiences as well as a positive force for teachers who combat relations of domination This work introduces an integrated theory of ideology that examines its necessary negative and positive functions A three dimensional theory highlights the concept of ideology during the reform process and links it to educational and social inequality This work looks at the rhetoric of education reform and ways to counteract it so that the goal of educational equality will be possible for all

**The Therapist as Listener** Peter Wilberg,2004 Listening is clearly central to the practice of both counselling and psychotherapy Given this it is quite extraordinary how little thought has been given to the nature of therapeutic listening and to the cultivation and evaluation of the therapist as listener Instead listening is a subject marginalised in both the theoretical literature on psychotherapy and in the practical training of counsellors and psychotherapists In this collection of essays and articles by Peter Wilberg the thinking of Martin Heidegger provides the platform for an exploration of the deeper nature of listening not simply as a passive prelude to therapeutic or diagnostic responses but as a mode of active inner communication with others What Wilberg calls Maieutic Listening is not a new form of psychotherapy but the innately therapeutic essence of listening as such understood not as a mere therapeutic skill but as a our most basic way of being and bearing with others in pregnant silence

**Social Constructionism, Discourse and Realism** Ian Parker,1998-04-28 This book charts a clear and accessible path through some of the key debates in contemporary psychology Drawing upon the wider critical and discursive turn in the human sciences Social Constructionism Discourse and Realism explores comprehensively the many claims about what we can know of reality in social constructionist and discursive research in psychology Relativist versus realist tensions go to the heart of current theoretical and methodological issues not only within psychology but across the social and human sciences By mapping the connections between theory method and politics in social research and placing these within the context of the broader social constructionist and discursive debates the internationally renowned contributors offer the reader an invaluable survey of the debates

*God, Science and Mind* Dennis Polis,2012-07-15 An exercise in Open Philosophy a worldview open to the full range of human experience including science spirituality and traditional philosophy Naturalism is exposed as a closed a priori worldview God is not an alternative to but the completion of scientific explanation The foundations and data of evolution do not show randomness but Mind in nature Evolution aims at verifiable targets and develops means in advance of need While God is proven deductively the fine tuning argument makes a strong case despite the anthropic principle The rules of evidence are discussed critically before reviewing data on mind ranging from neuroscience connectionism cybernetics to introspection parapsychology near death experiences mysticism even I Thou relationships Current theories are inadequate to important data points Traditional philosophy suggests a single substance two subsystem theory integrating a data processing brain and an intentional immaterial soul to solve the mind body problem

**Jacob and the Night of Faith** Gregory Scott Gorsuch, 2024-01-11 In retrospect Karl Barth conceded that everything which needs to be said considered and believed about God the Father and God the Son might be shown and illuminated in its foundation through God the Holy Spirit Nevertheless he refrained from doing so because it was still too difficult to distinguish between God's Spirit and man's spirit and so it was then However the late twentieth century explosion in various disciplines of thought now provides greater discernment between human and divine spirit a better understanding of the logic of spirit and the concept and role of spirit in distinction to mind and body Gorsuch's theological interdisciplinary investigation into the analogia spiritus and a Christian perichoretic relational ontology brings new meaning and coherence to previously difficult scriptures Moreover it provides the fundamental landscape for addressing issues of profound theological consequence 1 redressing the death of transcendence with a new understanding of relational dynamics through which free temporal and self determining human beings might mutually relate with an Eternal God of providence 2 laying the framework for a viable Christian pluralistic hypothesis in an increasingly pluralistic world and 3 providing an enriched theological anthropology for addressing human spirit origins and theodicy

**Revival: An Outline of Psychology (1968)** Willam McDougall, 2018-05-08 The time has gone by when any one man could hope to write an adequate text book of psychology The science has now so many branches so many methods so many fields of application and such an immense mass of data of observation is now on record that no one man can hope to have the necessary familiarity with the whole But even when a galaxy of learning and talent shall have written the text book of the future there will still be need for the book which will introduce the student to his science which will aim at giving him at the outset of his studies a profitable line of approach a fruitful way of thinking of psychological problems and a terminology as little misleading as possible The present volume is designed to render these services
