The United States of America Nathaniel Southgate Shaler,1894 *The Foreign Policy and Intervention Behavior of Africa's Middle Powers*

Olumuyiwa Babatunde Amao,2023-12-21 Based on a meta theoretical approach and insights derived from analytic eclecticism as a comparative instrument Olumuyiwa Babatunde Amao assesses Nigeria and South Africa s foreign policy and intervention behavior in Africa with a special focus on the conflict episodes in Sierra Leone 1991 1998 and the Democratic Republic of Congo DRC 1997 2005 The Foreign Policy and Intervention Behavior of Africa s Middle Powers An Analytic Eclecticism Approach explores the relative merits of structural realism and social constructivism in explaining Nigeria and South Africa s motives and intervention behavior and why more than one theoretical perspective is required to sufficiently analyze the complexity of their intervention decisions and behavior It demonstrates the overlapping nexus between conflict intervention structural constraints relative power pursuit and the dynamics of regional complexes Amao demonstrates how Nigeria and South Africa s relative power positions identities as African actors de colonization and anti apartheid struggles and the existing values and bonds that their contiguous states share play a crucial role in their intervention behavior Using Sierra Leone and the DRC as case studies this book illustrates the advantage of applying a multi perspective eclectic approach to foreign policy analysis and provides an alternative to the theoretical turf wars that are all too prevalent in the discipline of international relations

The Story of Our Continent Nathaniel Southgate Shaler,1891

Where Is the Home of the

Black Man? Emmanuel Ehiosun, 2019-07-01 It is no news that the oldest and second largest continent in the world is Africa It is also a popular fact that Africa despite being greatly endowed with natural resources is the poorest and the least developed of the continents of the world Many theories have been postulated to try to justify why Africa is in such poor state and why it can never grow However in this book the author Emmanuel Ehiosun argues that there is no reason why Africa should be backward and that there are five practical steps Africa can follow to become a leading continent in the world In this book you will learn the following The State of Africa in a changing world Why Africa despite being rich in resources is a poor continent How African rulers oppress the citizens through politics and slavery About the slave trade and the civilizations of the black race How to move Africa forward through visionary leadership How African citizens can build their individual countries by themselves Why racism is not Africa's problem but modern day slavery is Why every black person in diaspora must return to Africa to make it a home How religion can be a tool for civilization and reformation in Africa How to make Africa the future of the world

Guinea Pigs of the New World Order Joachim Onyeakor, 2012 The author believes that those labelled as blacks in the world are the greatest victims of racial discrimination and will be highly victimised as the New World Government takes full force According to the author racism is not a problem as humans seem to have evolved with some seemingly physical differences resulting in different races but the main problem is racial discrimination which has resulted in series of racially driven ugliness that people of colour most especially blacks face in the world in these present times including the treatment they shall receive from the New World Government The African continent harbours this breed of humans called blacks and many studies have been undertaken to prove whether African natives are inferior in intelligence therefore incapable of higher thoughts and higher arts The author begs to disagree hence race has nothing to do with human intelligence and the reasons why there is insignificant human development in Africa according to the author are human slavery which happened in the past which was a plot to use African natives as human machines forced dominance which resulted in land seizures in some part of Africa and colonial invasion which was a plot to acquire land and natural resources and not to help Africa as the imperialists conspiracy propagandists want all to believe Colonialism came with religious tools enforced with guns and brute force and without the invasion of the colonialists Africans would have developed considering the pyramids of Egypt the axioms of Ethiopia the medical institutes in Timbuktu in the ancient times and more According to the author the reason why the African continent is paralysed in terms of economic development is mental slavery leading to economic slavery Mental slavery is caused by racial discrimination mind diversion using information and religious tools pseudoscience or superstitions faulty education colonialism and colonial destruction of African cultural evolution The author believes that since Chinese and Indians could develop and attain economic freedom so also can Africa develop but Africans must first deal with mental slavery Mental slavery leads to economic slavery Today Africans cannot produce what they consume nor consume what they produce all because of mental slavery An endangered species is a population of organisms

which is facing a high risk of becoming extinct because it is either few in numbers or threatened by changing environmental or predation parameters Technically speaking African natives are facing predation parameters and it seems that the New World Order since its creation and inception designated the African natives that they call blacks as guinea pigs that will be used in its operations and to advance its cause The black man has faced cruel slavery colonialism forced dominance and subjugation neo colonialism and he is now also facing mental slavery a far more dangerous situation It is a situation not recognisable with the naked eye yet exists and poses more danger than all of the former creating a cloud of mental slaves who are moving in the wrong direction applying the wrong life operational parameters Development is extremely slow in the African continent and the advanced nations have ceased that opportunity to transform the continent into a huge market for their finished goods in the process also fuelling mind slavery to impair development They hypocritically condemn the African continent as incapable of self sustenance but it has never occurred to anyone that ifAfrica stands up today those advance nations will lose their market In exchange directly or indirectly for the rich natural resources of the African continent the advanced nations have fuelled wars and mental slavery in the continent while still condemning the continent Unfortunately the same mercenaries of the New World Government who enslaved the African people in

Post-Pandemic Leadership Morgen Witzel,2022-04-28 This book shows readers how to rethink and reimagine leadership and charts a course towards a new vision of leadership It outlines lessons to be learned for leadership not only after the COVID pandemic but also in light of other ongoing crises around issues such as climate change and global inequality The pandemic has shone a harsh spotlight not just on the leaders of organisations but on the concept of leadership itself and the way we lead Many of those who were in positions of power before the crisis have been found wanting too often our idols have turned out to have feet of clay But does the problem lie with the leaders themselves or do the roots of the problem lie deeper Do we need to start rethinking and reimagining the kind of leadership we will need in a post COVID world Post Pandemic Leadership brings voices from every sector to demonstrate what changes we can make in order to make leadership fit for purpose in the twenty first century Illustrating a need for a radical change in leadership with leaders focusing much more on human relationships kindness fairness well being and a general sense of responsibility this book will be of interest to both established leaders and the next generation of leaders in education and in practice
