Theresa Enright

Metropolis Paris :

The Making of Grand Paris Theresa Enright, 2023-09-19 A critical examination of metropolitan planning in Paris the Grand Paris initiative and the building of today's networked global city. In 2007 the French government announced the Grand Paris initiative. This ambitious project reimagined the Paris region as integrated, balanced, global, sustainable, and prosperous. Metropolitan solidarity would unite divided populations, a new transportation system, the Grand Paris Express would connect the affluent city proper with the low-income suburbs. Streamlined institutions would replace fragmented governance structures. Grand Paris is more than a redevelopment plan; it is a new paradigm for urbanism. In this first English-language examination of Grand Paris, Theresa Enright offers a critical analysis of the early stages of the project, considering whether it can achieve its twin goals of economic competitiveness and equality. Enright argues that by orienting the city around growth and marketization, Grand Paris reproduces the social and spatial hierarchies it sets out to address. For example, large expenditures for the Grand Paris Express are made not for the public good but to increase the attractiveness of the region to private investors, setting off a real estate boom encouraging gentrification and leaving many residents still unable to get from here to there. Enright describes Grand Paris as an example of what she calls grand urbanism: large-scale planning that relies on infrastructural megaprojects to reconfigure urban regions in pursuit of speculative redevelopment. Democracy and equality suffer under processes of grand urbanism. Given the logic of commodification on which Grand Paris is based, these are likely to suffer as the project moves forward.

Indo-Pacific Smart Megacity System T. M. Vinod Kumar, 2023-12-18

This book is an in-depth study of the Indo-Pacific region for effective interventions in the megacities system. First, based on several criteria, the region is identified as homogeneous country groupings of diversity, a multi-polar spatial system, and as program regions of QUAD and I2U2 for action programs and investment, transcending many nations but mostly the ocean space of the Indo-Pacific connecting all megacities sub-regions spatially and functionally. Then, the megacities with problems and prospects for economic integration are studied from the point of view of regional economics and international trade, and finally, the rural-urban interface with case studies of selected countries is presented. Prospects of systems of megacities and individual megacities for regional economies are designed. Existing interconnections through rail, air, and ocean of megacity systems, their capacity, performance, and potential are analyzed for emerging issues. International trade among the megacity systems, countries with emerging issues and barriers are presented. The mobility of money, goods, and services among the systems of megacities is analyzed. Rule-based diplomacy and other emerging options are discussed to sustain the above. Calls for a study of the Security of the Indo-Pacific region. Finally, the emerging architecture for megacity system governance is also presented. Out of 21 megacities in the Indo-Pacific, an in-depth study of a few in India and Japan in the Indo-Pacific region for effective economic interventions in the megacities system at the city level was studied. COVID-19 has affected most of the countries in the Indo-Pacific. With a contraction of GDP and a GDP growth rate negative, the number below the poverty level
