Penny,Juan Antonio Ortega y Medina,1987 **Estado actual de los principales edificios arqueológicos de México** Mexico. Dirección de Arqueología,1928 **Ancient Maya Teeth** Vera Tiesler,2025-01-07 A study of Maya dental modification from archaeological sites spanning three millennia Dental modification was common across ancient societies but perhaps none were more avid practitioners than the Maya They filed their teeth flat or pointy polished and drilled them and crafted decorative inlays of jade and pyrite Unusually Maya of all social classes ages and professions engaged in dental modification What did it mean to them Ancient Maya Teeth is the most comprehensive study of Maya dental modification ever published based on thousands of teeth recovered from 130 sites spanning three millennia Esteemed archaeologist Vera Tiesler sifts the evidence much of it gathered with her own hands and illustrated here with more than a hundred photographs Exploring the underlying theory and practice of dental modification Tiesler raises key questions How did modifications vary across the individual s lifespan What tools were used How did the Maya deal with pain and malpractice How did they keep their dentitions healthy functioning and beautiful What were the relationships among gender social identity and religious identifications Addressing these and other issues Ancient Maya Teeth reveals how dental modification customs shifted over the centuries indexing other significant developments in Mayan cultural history **El México antiguo ,1919** **Forensic Archaeology** W. J. Mike Groen,Nicholas Márquez-Grant,Rob Janaway,2015-04-27 Forensic archaeology is mostly defined as the use of archaeological methods and principles within a legal context However such a definition only covers one aspect of forensic archaeology and misses the full potential this discipline has to offer This volume is unique in that it contains 57 chapters from experienced forensic archaeological practitioners working in different countries intergovernmental organisations or NGO s It shows that the practice of forensic archaeology varies worldwide as a result of diverse historical educational legal and judicial backgrounds The chapters in this volume will be an invaluable reference to forensic archaeologists forensic anthropologists humanitarian and human rights workers forensic scientists police officers professionals working in criminal justice systems and all other individuals who are interested in the potential forensic archaeology has to offer at scenes of crime or places of incident This volume promotes the development of forensic archaeology worldwide In addition it proposes an interpretative framework that is grounded in archaeological theory and methodology integrating affiliated behavioural and forensic sciences **International Handbook of Historical Archaeology** Teresita Majewski,David Gaimster,2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of

investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today
