Michael Sorkin Studio Wiggle:

Michael Sorkin Studio Michael Sorkin, 1998 From the biomorphic Governor's Island proposal to the unabashed representationalism of the Beached Houses from the luminescent tubers of the Miira installation to the neurological networks of the Neurasia project the Studio combats the sprawl of automobile centric urbanism with a decidedly organic vocabulary

The Urban Design Reader Michael Larice, Elizabeth Macdonald, 2013-05-07 The second edition of The Urban Design Reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design. Nearly 50 generous selections include seminal contributions from Howard Le Corbusier, Lynch and Jacobs to more recent writings by Waldheim, Koolhaas and Sorkin. Following the widespread success of the first edition of The Urban Design Reader, this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today. The six part structure of the second edition guides the reader through the history, theory and practice of urban design. The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century. Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s. These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places. The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places. These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism. The fourth part of the Reader explores key issues in urban design and development. Ideas about sprawl density, community health, public space and everyday life are the primary focus here. Several new selections in this part of the book also highlight important international development trends in the Middle East and China. Part Five presents environmental challenges faced by the built environment professions today, including recent material on landscape urbanism, sustainability and urban resiliency. The final part examines professional practice and current debates in the field where urban designers work what they do, their roles, their fields of knowledge and their educational development. The section concludes with several position pieces and debates on the future of urban design practice. This book provides an essential resource for students and practitioners of urban design, drawing together important but widely dispersed writings. Part and section introductions are provided to assist readers in understanding the context of the material, summary messages, impacts of the writing and how they fit into the larger picture of the urban design field.

Reflections on Architecture, Society and Politics Graham Cairns, 2016-10-04. *Reflections on Architecture, Society and Politics* brings together a series of thirteen interview articles by Graham Cairns in collaboration with some of the most prominent polemic thinkers and critical practitioners from the fields of architecture and the social sciences, including Noam Chomsky, Peggy Deamer, Robert A. M. Stern, Daniel Libeskind and

Kenneth Frampton Each chapter explores the relationship between architecture and socio political issues through discussion of architectural theories and projects citing specific issues and themes that have led to and will shape the various aspects of the current and future built environment Ranging from Chomsky's examination of the US Mexico border as the architecture of oppression to Robert A M Stern's defence of projects for the Disney corporation and George W Bush this book places politics at the center of issues within contemporary architecture **Architectural Record**, 1998-10 **On the Nature of Things** Gavin Keeney, 2000-11 These 13 perceptive portraits span the whole breadth of landscape design from the post ecological utopia of Michael Sorkin New York Vienna to the urban pragmatism of the Roma Design group San Francisco

The Architecture Annual, 2000 **World Architecture**, 2000 **The Mutiara Masterplan** Ken Yeang, 2007 This book examines the competition submissions for a new suburban centre located on the edge of **Humanitarian Architecture** Esther Charlesworth, 2014-06-27 Never has the demand been so urgent for architects to respond to the design and planning challenges of rebuilding post disaster sites and cities In 2011 more people were displaced by natural disasters 42 million than by wars and armed conflicts And yet the number of architects equipped to deal with rebuilding the aftermath of these floods fires earthquake typhoons and tsunamis is chronically short This book documents and analyses the expanding role for architects in designing projects for communities after the event of a natural disaster The fifteen case studies featured in the body of the book illustrate how architects can use spatial sensibility and integrated problem solving skills to help alleviate both human and natural disasters The cases include Lizzie Babister Department of International Development UK Shigeru Ban Winner of The Pritzker Architecture Prize 2014 Shigeru Ban Architects and Voluntary Architects Network Japan Eric Cesal Disaster Reconstruction and Resiliency Studio and Architecture for Humanity Japan Hsieh Ying Chun Atelier 3 Taiwan Nathaniel Corum Education Outreach and Architecture for Humanity USA Sandra D Urzo Shelter and Settlements and International Federation of the Red Cross and Red Crescent Societies Switzerland Brett Moore World Vision International Australia Michael Murphy MASS Design Group USA David Perkes Gulf Coast Community Design Studio USA Paul Pholeros Healthabitat Australia Patama Roonrakwit Community Architects for Shelter and Environment Thailand Graham Saunders International Federation of Red Cross and Red Crescent Societies Switzerland Kirtee Shah Ahmedabad Study Action Group India Maggie Stephenson UN HABITAT Haiti Anna Wachtmeister Catholic Organisation for Relief and Redevelopment Aid the Netherlands The interviews and supporting essays show built environment professionals collaborating with post disaster communities as facilitators collaborators and negotiators of land space and shelter rather than as save the world modernists as often portrayed in the design media The goal is social and physical reconstruction as a collaborative process involving a damaged community and its local culture environment and economy not just shelter projects that build houses but leave no economic footprint or longer term community infrastructure What defines and unites the architects interviewed for Humanitarian Architecture is their collective belief that through a consultative process of spatial problem solving the design

profession can contribute in a significant way to the complex post disaster challenge of rebuilding a city and its community
