Renzi, 2004-03-24 Jules Verne Voila a name that resonates with visions of fantastic adventures and images of exotic exploits In his voyages extraordinaires the noted French author fuses his encyclopedic knowledge of science and geography with his ability to tell fascinating tales taking his readers on unprecedented journeys across the globe into the earth and out into space This revered writer who with his boundless imagination had hoped to contribute substantially to the world of letters has surpassed that expectation to become coincidentally a significant influence on film Jules Verne on Film is both a penetrating analytical overview of Verne s epic novels and a comprehensive filmography of the numerous films inspired by his stories and characters There are the obvious adaptations that come directly from the pages of Verne s writings films such as *In Search of the Castaways* and *Mysterious Island* However looking closely at the plots characters and themes of many other films science fiction and otherwise one discovers that the incomparable Verne has had a far wider influence on filmmakers than one might have thought For instance most of us are familiar with Disney s *20 000 Leagues Under the Sea* 1954 and some of us may have even seen the two 1997 television productions But Verne s classic undersea adventure also provides the underpinnings for such entertaining movies as *Fantastic Voyage* 1966 and *Innerspace* 1987 Structurally Jules

Verne on Film begins with a biographical sketch and contains 23 chapters arranged alphabetically according to book title starting with *The Adventures of Captain Hatteras* and ending with *Voyage Across the Impossible*. Each chapter includes a summary and analysis of Verne's story followed by a chronological treatment of the cinematic adaptations compared to their respective written work. Production credits appear in the film entries along with plot synopses and thorough critical commentaries.

*Science Fiction Film Directors, 1895-1998* Dennis Fischer, 2011-12-14 This enormous and exhaustive reference book has entries on every major and minor director of science fiction films from the inception of cinema circa 1895 through 1998. For each director there is a complete filmography including television work, a career summary, a critical assessment, and behind-the-scenes production information. Seventy-nine directors are covered in especially lengthy entries, and a short history of the science fiction film genre is also included.

*Hollywood Presents Jules Verne* Brian Taves, 2015-05-26 Even for those who have never read Jules Verne (1828-1905), the author's very name conjures visions of the submarine in *Twenty Thousand Leagues Under the Sea*, the epic race in *Around the World in Eighty Days*, the spacecraft in *From the Earth to the Moon*, and the daring descent in *Journey to the Center of the Earth*. One of the most widely translated authors of all time, Verne has inspired filmmakers since the early silent period and continues to fascinate audiences more than one hundred years after his works were first published. His riveting plots and vivid descriptions easily transform into compelling scripts and dramatic visual compositions. In *Hollywood Presents Jules Verne*, Brian Taves investigates the indelible mark that the author has left on English language cinema. Adaptations of Verne's tales have taken many forms: early movie shorts, serials, feature films, miniseries, and television shows, and have been produced as both animated and live action films. Taves illuminates how, as these stories have been made and remade over the years, each new adaptation looks back not only to Verne's words but also to previous screen incarnations. He also examines how generations of actors have portrayed iconic characters such as Phileas Fogg and Captain Nemo, and how these figures are treated in pastiches such as *Journey 2: The Mysterious Island* (2012). Investigating the biggest box office hits as well as lower budget productions, this comprehensive study will appeal not only to fans of the writer's work but also to readers interested in the ever-changing relationship between literature, theater, and film.

*Library of Congress Information Bulletin*, 1996

*Saul Bass* Jan-Christopher Horak, 2014-11-18 Iconic graphic designer and Academy Award-winning filmmaker Saul Bass (1920-1996) defined an innovative era in cinema. His title sequences for films such as Otto Preminger's *The Man with the Golden Arm* (1955) and *Anatomy of a Murder* (1959), Alfred Hitchcock's *Vertigo* (1958) and *North by Northwest* (1959), and Billy Wilder's *The Seven Year Itch* (1955) introduced the idea that opening credits could tell a story, setting the mood for the movie to follow. Bass's stylistic influence can be seen in popular Hollywood franchises from the *Pink Panther* to *James Bond*, as well as in more contemporary works such as Steven Spielberg's *Catch Me If You Can* (2002) and television's *Mad Men*. The first book to examine the life and work of this fascinating figure, *Saul Bass: Anatomy of Film Design* explores the designer's revolutionary career and his lasting

impact on the entertainment and advertising industries Jan Christopher Horak traces Bass from his humble beginnings as a self taught artist to his professional peak when auteur directors like Stanley Kubrick Robert Aldrich and Martin Scorsese sought him as a collaborator He also discusses how Bass incorporated aesthetic concepts borrowed from modern art in his work presenting them in a new way that made them easily recognizable to the public This long overdue book sheds light on the creative process of the undisputed master of film title design a man whose multidimensional talents and unique ability to blend high art and commercial imperatives profoundly influenced generations of filmmakers designers and advertisers
