50MINUTES COM Art Literature The Art Literature series from the 50Minutes collection aims to introduce readers to the figures and movements that have shaped our culture over the centuries Our guides are written by experts in their field and each feature a full biography an introduction to the relevant social political and historical context and a thorough discussion and analysis of the key works of each artist writer or movement making them the ideal starting point for busy readers looking for a quick way to broaden their cultural horizons *Leonardo, Michelangelo and Raphael* Charles River Editors, 2018-01-08 Includes pictures of important people and places as well as the artists most famous works Discusses the relationships between the artists Includes a Bibliography on each man for further reading The Renaissance spawned the use of the label Renaissance Man to describe a person who is extremely talented in multiple fields and no discussion of the Renaissance is complete without the original Renaissance Man Leonardo da Vinci Indeed if 100 people are asked to describe Leonardo in one word they might give 100 answers As the world s most famous polymath and genius Leonardo found time to be a painter sculptor architect musician scientist mathematician engineer inventor anatomist geologist cartographer botanist and writer It would be hard to determine which field Leonardo had the greatest influence in His Mona Lisa and The Last Supper are among the most famous paintings of all time standing up against even Michelangelo s work But even if he was not the age s greatest artist Leonardo may have conducted his most influential work in other fields His emphasis on the importance of Nature would influence Enlightened philosophers centuries later and he sketched speculative designs for gadgets like helicopters that would take another 4 centuries to create Leonardo s vision and philosophy were made possible by his astounding work as a mathematician engineer and scientist At a time when much of science was dictated by Church teachings Leonardo studied geology and anatomy long before they truly even became scientific fields and he used his incredible artistic abilities to sketch the famous Vitruvian Man linking art and science together It s possible that Michelangelo is the most famous artist in history but it s also possible that he s an underrated artist The vast influence of his career is reflected by the fact that he is not only known for his own art but has also come to embody an entire epoch of Western art Along with Leonardo da Vinci there are no other artists who so fully capture the spirit of scientific and artistic discovery that characterized art during the late 15th and early 16th centuries Moreover Michelangelo s career is distinguished from that of his peers through his seamless ability to work within different art forms receiving acclaim regardless of the medium After first rising to fame as a sculptor he also painted and served as an architect and since his death Michelangelo has also become decorated for his prolific output as a poet The diversity and high standard of his work no matter the medium make it difficult to even arrive at a most famous work People can make a compelling argument for at least three works the statue of David 1501 1504 the ceiling of the Sistine Chapel 1508 1512 or the design for St Peter s Basilica worked on from 1546 through his death That the same artist produced these canonical monuments of Western art is remarkable but that each was made through a different medium defines Michelangelo as a sui generis talent Although

Raphael was perhaps the most favored artist of the Italian Renaissance his reputation has since been surpassed by famous contemporaries like Leonardo da Vinci and Michelangelo To this day it is difficult to think of Raphael without considering his artistic rivals and comparing the artwork between Raphael and his contemporaries illuminates Raphael s artistic style and the reception surrounding his work In many ways his art synthesized the styles of other artists Raphael s artwork was not produced in a vacuum and his career reflects the rise of the artist as a culturally significant figure while also preserving the grandeur of the church Even if he lacked the innovation of Leonardo or Michelangelo Raphael was every bit as renowned during the time period and an analysis of his life explains his mass appeal and cultural significance **Michelangelo**

Eugène Müntz,2015-09-15 Michelangelo like Leonardo was a man of many talents sculptor architect painter and poet he made the apotheosis of muscular movement which to him was the physical manifestation of passion He moulded his draughtsmanship bent it twisted it and stretched it to the extreme limits of possibility There are not any landscapes in Michelangelo s painting All the emotions all the passions all the thoughts of humanity were personified in his eyes in the naked bodies of men and women He rarely conceived his human forms in attitudes of immobility or repose Michelangelo became a painter so that he could express in a more malleable material what his titanesque soul felt what his sculptor s imagination saw but what sculpture refused him Thus this admirable sculptor became the creator at the Vatican of the most lyrical and epic decoration ever seen the Sistine Chapel The profusion of his invention is spread over this vast area of over 900 square metres There are 343 principal figures of prodigious variety of expression many of colossal size and in addition a great number of subsidiary ones introduced for decorative effect The creator of this vast scheme was only thirty four when he began his work Michelangelo compels us to enlarge our conception of what is beautiful To the Greeks it was physical perfection but Michelangelo cared little for physical beauty except in a few instances such as his painting of Adam on the Sistine ceiling and his sculptures of the Piet Though a master of anatomy and of the laws of composition he dared to disregard both if it were necessary to express his concept to exaggerate the muscles of his figures and even put them in positions the human body could not naturally assume In his later painting The Last Judgment on the end wall of the Sistine he poured out his soul like a torrent Michelangelo was the first to make the human form express a variety of emotions In his hands emotion became an instrument upon which he played extracting themes and harmonies of infinite variety His figures carry our imagination far beyond the personal meaning of the names attached to them The Last Judgment James A.

Connor,2009-06-23 A rich exploration of Michelangelo s masterpiece The Last Judgment unlocking the mysteries of a turbulent period in European history **Leonardo, Michelangelo and Raphael: the Greatest Artists of the**

**Renaissance** Charles River Charles River Editors,2013-09-04 Includes pictures of important people and places as well as the artists most famous works Discusses the relationships between the artists Includes a Bibliography on each man for further reading The Renaissance spawned the use of the label Renaissance Man to describe a person who is extremely talented in

multiple fields and no discussion of the Renaissance is complete without the original Renaissance Man Leonardo da Vinci. Indeed if 100 people are asked to describe Leonardo in one word they might give 100 answers. As the world's most famous polymath and genius, Leonardo found time to be a painter, sculptor, architect, musician, scientist, mathematician, engineer, inventor, anatomist, geologist, cartographer, botanist, and writer. It would be hard to determine which field Leonardo had the greatest influence in. His *Mona Lisa* and *The Last Supper* are among the most famous paintings of all time, standing up against even Michelangelo's work. But even if he was not the age's greatest artist, Leonardo may have conducted his most influential work in other fields. His emphasis on the importance of Nature would influence Enlightened philosophers centuries later, and he sketched speculative designs for gadgets like helicopters that would take another 4 centuries to create. Leonardo's vision and philosophy were made possible by his astounding work as a mathematician, engineer, and scientist. At a time when much of science was dictated by Church teachings, Leonardo studied geology and anatomy long before they truly even became scientific fields, and he used his incredible artistic abilities to sketch the famous Vitruvian Man, linking art and science together. It's possible that Michelangelo is the most famous artist in history, but it's also possible that he's an underrated artist. The vast influence of his career is reflected by the fact that he is not only known for his own art but has also come to embody an entire epoch of Western art. Along with Leonardo da Vinci, there are no other artists who so fully capture the spirit of scientific and artistic discovery that characterized art during the late 15th and early 16th centuries. Moreover, Michelangelo's career is distinguished from that of his peers through his seamless ability to work within different art forms, receiving acclaim regardless of the medium. After first rising to fame as a sculptor, he also painted and served as an architect, and since his death, Michelangelo has also become decorated for his prolific output as a poet. The diversity and high standard of his work, no matter the medium, make it difficult to even arrive at a most famous work. People can make a compelling argument for at least three works: the statue of David (1501-1504), the ceiling of the Sistine Chapel (1508-1512), or the design for St. Peter's Basilica, worked on from 1546 through his death. That the same artist produced these canonical monuments of Western art is remarkable, but that each was made through a different medium defines Michelangelo as a *sui generis* talent. Although Raphael was perhaps the most favored artist of the Italian Renaissance, his reputation has since been surpassed by famous contemporaries like Leonardo da Vinci and Michelangelo. To this day, it is difficult to think of Raphael without considering his artistic rivals and comparing the artwork between Raphael and his contemporaries, which illuminates Raphael's artistic style and the reception surrounding his work. In many ways, his art synthesized the styles of other artists. Raphael's artwork was not produced in a vacuum, and his career reflects the rise of the artist as a culturally significant figure while also preserving the grandeur of the church. Even if he lacked the innovation of Leonardo or Michelangelo, Raphael was every bit as renowned during the time period, and an analysis of his life explains his mass appeal and cultural significance.
