*Handbook of Hindu Mythology* George M. Williams, 2008-03-27 Unlike many other ancient mythologies Hinduism thrives in the modern world. One billion followers and countless others have been captivated by its symbolic representations of love karma and reincarnation. *Handbook of Hindu Mythology* offers an informative introduction to this dauntingly complex mythology of multifaceted deities, lengthy heroic tales and arcane philosophies all with a 3 000 year history of reinterpretations and adaptations. Williams offers a number of pathways by which to approach Hinduism's ever changing gods and goddesses e.g. Brahm, Vishnu, Siva, spiritual verses such as the vedas, secular epics including the R̄m̄yāna and the Mahābhārata, myths within myths, devotional and esoteric traditions, psychic and yogic disciplines and magical practices. With this handbook readers can explore the history of Hindu mythology, follow a detailed timeline of key episodes and historical events and look up specific elements of historical or contemporary Hinduism in a beautifully illustrated reference work. It is the ideal introduction to the origins of Hinduism, the culture that shaped it from antiquity to the present and the age old stories, ideas and traditions that speak to the human condition as eloquently today as ever. Including annotated bibliographies, a glossary of cultural and mythological terms and numerous illustrations, here is a gold mine of information on Hindu mythology.

*Children's Books on Ancient Greek and Roman Mythology* Antoine Brazouski, Mary J. Klatt, 1993-11-23 The classical heritage continues to impact modern culture in many ways. This bibliography lists and describes those books on Greek and Roman mythology from the mid 19th century to the present which are useful for introducing children to the classical world. The volume begins with a brief history of children's books on classical mythology in the United States. A chapter then discusses the various techniques through which classical myths were adapted for children. The annotated bibliography follows with each entry including a critical annotation on how closely the work adheres to the original myth. Each entry also includes an indication of the grade level of each book. Indexes allow the user to locate sources according to title, illustrator, time period, myth and subject.

formation : A life history study of the factors that influence the acceptance or rejection of the Big Bang theory and theory of biological evolution among lifelong learners. Dr Ian S. G. Blagrove, 2025-05-23 Abstract This book explores the factors that influence the acceptance or rejection of the Big Bang theory and the theory of biological evolution. The rejection of either theory can occur despite the time that has elapsed since the original theories were proposed and their wider acceptance. The study critically examines the biographies of individuals establishing the factors that influence their rejection or acceptance of either theory. The book concludes that individuals are affected by multiple factors and explores how these findings may contradict other studies which identify religious belief as the driver for rejection. The author proposes an original theory of opinion formation that is specific to both scientific theories and suggests the use of inclusive teaching methods and historical

narrative within science lessons which may assist in explaining to students the story of discovery of each scientific theory as well as teaching the theory itself The study also concludes that the rejection of both theories particularly by older participants may be linked to past discredited theories including the Steady State theory and the theory of Panspermia

**The Politics of Perfection** Kimberly Hurd Hale,2016-10-07 The Politics of Perfection Technology and Creation in Literature and Film provides an exploration of the relationship between modern technological progress and classical liberalism Each chapter provides a detailed analysis of a film or novel including Fritz Lang s Metropolis Ridley Scott s Prometheus Michael Gondry s Eternal Sunshine of the Spotless Mind Kazuo Ishiguro s Never Let Me Go and Margaret Atwood s Oryx and Crake These works of fiction are examined through the lens of political thinkers ranging from Plato to Hannah Arendt The compatibility of classical liberalism and technology is questioned using fiction as a window into Western society s views on politics economics religion technology and the family This project explores the intersection between human nature and creation particularly artificial intelligence and genetic engineering using works of literature and film to access cultural concerns Each of the works featured asks a question about the relationship between technology and creation Technology also allows humanity to create new types of life in the forms of artificial intelligence and genetically engineered beings This book studies works of literature and film as evidence of the contemporary unease with the progress of technology and its effect on the political realm
