environment Their success will depend on the strategies they practice and adopt Every year new ideas and concepts are emerging in order for companies to become successful enterprises Cross Border Enterprises is the new hot topic arising in the business process world at present Many terms have been coined together and are being driven in the popular business press to describe this new strategy of conducting business ie Extended Enterprise Browne et al 1995 O Neill and Sacket 1994 Busby and Fan 1993 Caskey 1995 Virtual Enterprise Goldmann and Preiss 1991 Parunak 1994 Goranson 1995 Doumeingts et al 1995 Seamless Enterprise Harrington 1995 Inter Enterprise Networking Browne et al 1993 Dynamic Enterprise Weston 1996 and so on Many people have argued that they mean the same thing just using different words Others feel they are different But how different are they In this paper the authors will present some basic lines required from this new strategy for conducting and coordinating distributed business processes DBP as well as trying to clarify the particularities of two of the widest spread terms related to it Virtual and Extended Enterprise 2 CLUSTERS OF PRESSURES The business world currently faces an increased trend towards globalisation environmentally benign production and customisation of products and processes forcing individual enterprises to work together across the value chain in order to cope with market influences

**The Software Factory Challenge** Herbert Weber,1997 The Eureka Software Factory project ESF was set up by a Group of European partners in 1987 Its objective was broadly to improve the large scale software production process by introducing an industrialised approach to have The Software Factory Challenge social organisational and technical aspects The project was set up under the pan European Eureka programme and it was funded by the partners together with their national governments This book is not a history of the ESF project but rather a presentation of its main ideas and achievements and an account of how the concepts pioneered by the project have become part of a general movement in both the industrial and academic domains In this movement the facility for the production use and maintenance of large scale computer artefacts the Software Factory is treated in a wide and organic way so as to include concepts such as business value and process improvement with the development of new technologies being driven by these new wide requirements This new approach is in contrast with a narrowly technological one in which individual tasks like programming are aided by machines but in which the production process as a whole is not supported The main body of the book is divided into four Parts Part I gives a short overview of the ESF project and its ideas and goes on to attempt to place the ESF work in the context of industry as a whole with reference to both producers and users of Information Technology systems Part II sets out to explain the technological basis of the Software Factory as seen by ESF and goes on to describe some experimental and pioneering implementations of Factory Support Environments and their constituents Part III is devoted to the most complete implementation of an ESF Factory Support Environment to date Kernel 2r This Section provides a highly detailed discussion of both design and implementation issues In Part IV addresses what deployment strategies are now available to continue the spread of these ideas in order to meet the goal of better software based systems i

e systems which are safer more economical to build more easily changed and more useful than those that have been built up to now Finally a Glossary of Terms and a list of References is given Readers those who have a professional interest in Information Technology *TCP/IP Tutorial and Technical Overview* Eamon Murphy, 1995 The fifth edition of this very successful IBM Redbook provides a complete understanding of the TCP IP protocol suite and how IBM s suite of networking products work in a heterogeneous networking environment New features include an Internet access chapter and new sections on MIME SNMPv2 DHCP and other state of the art protocols
